Water

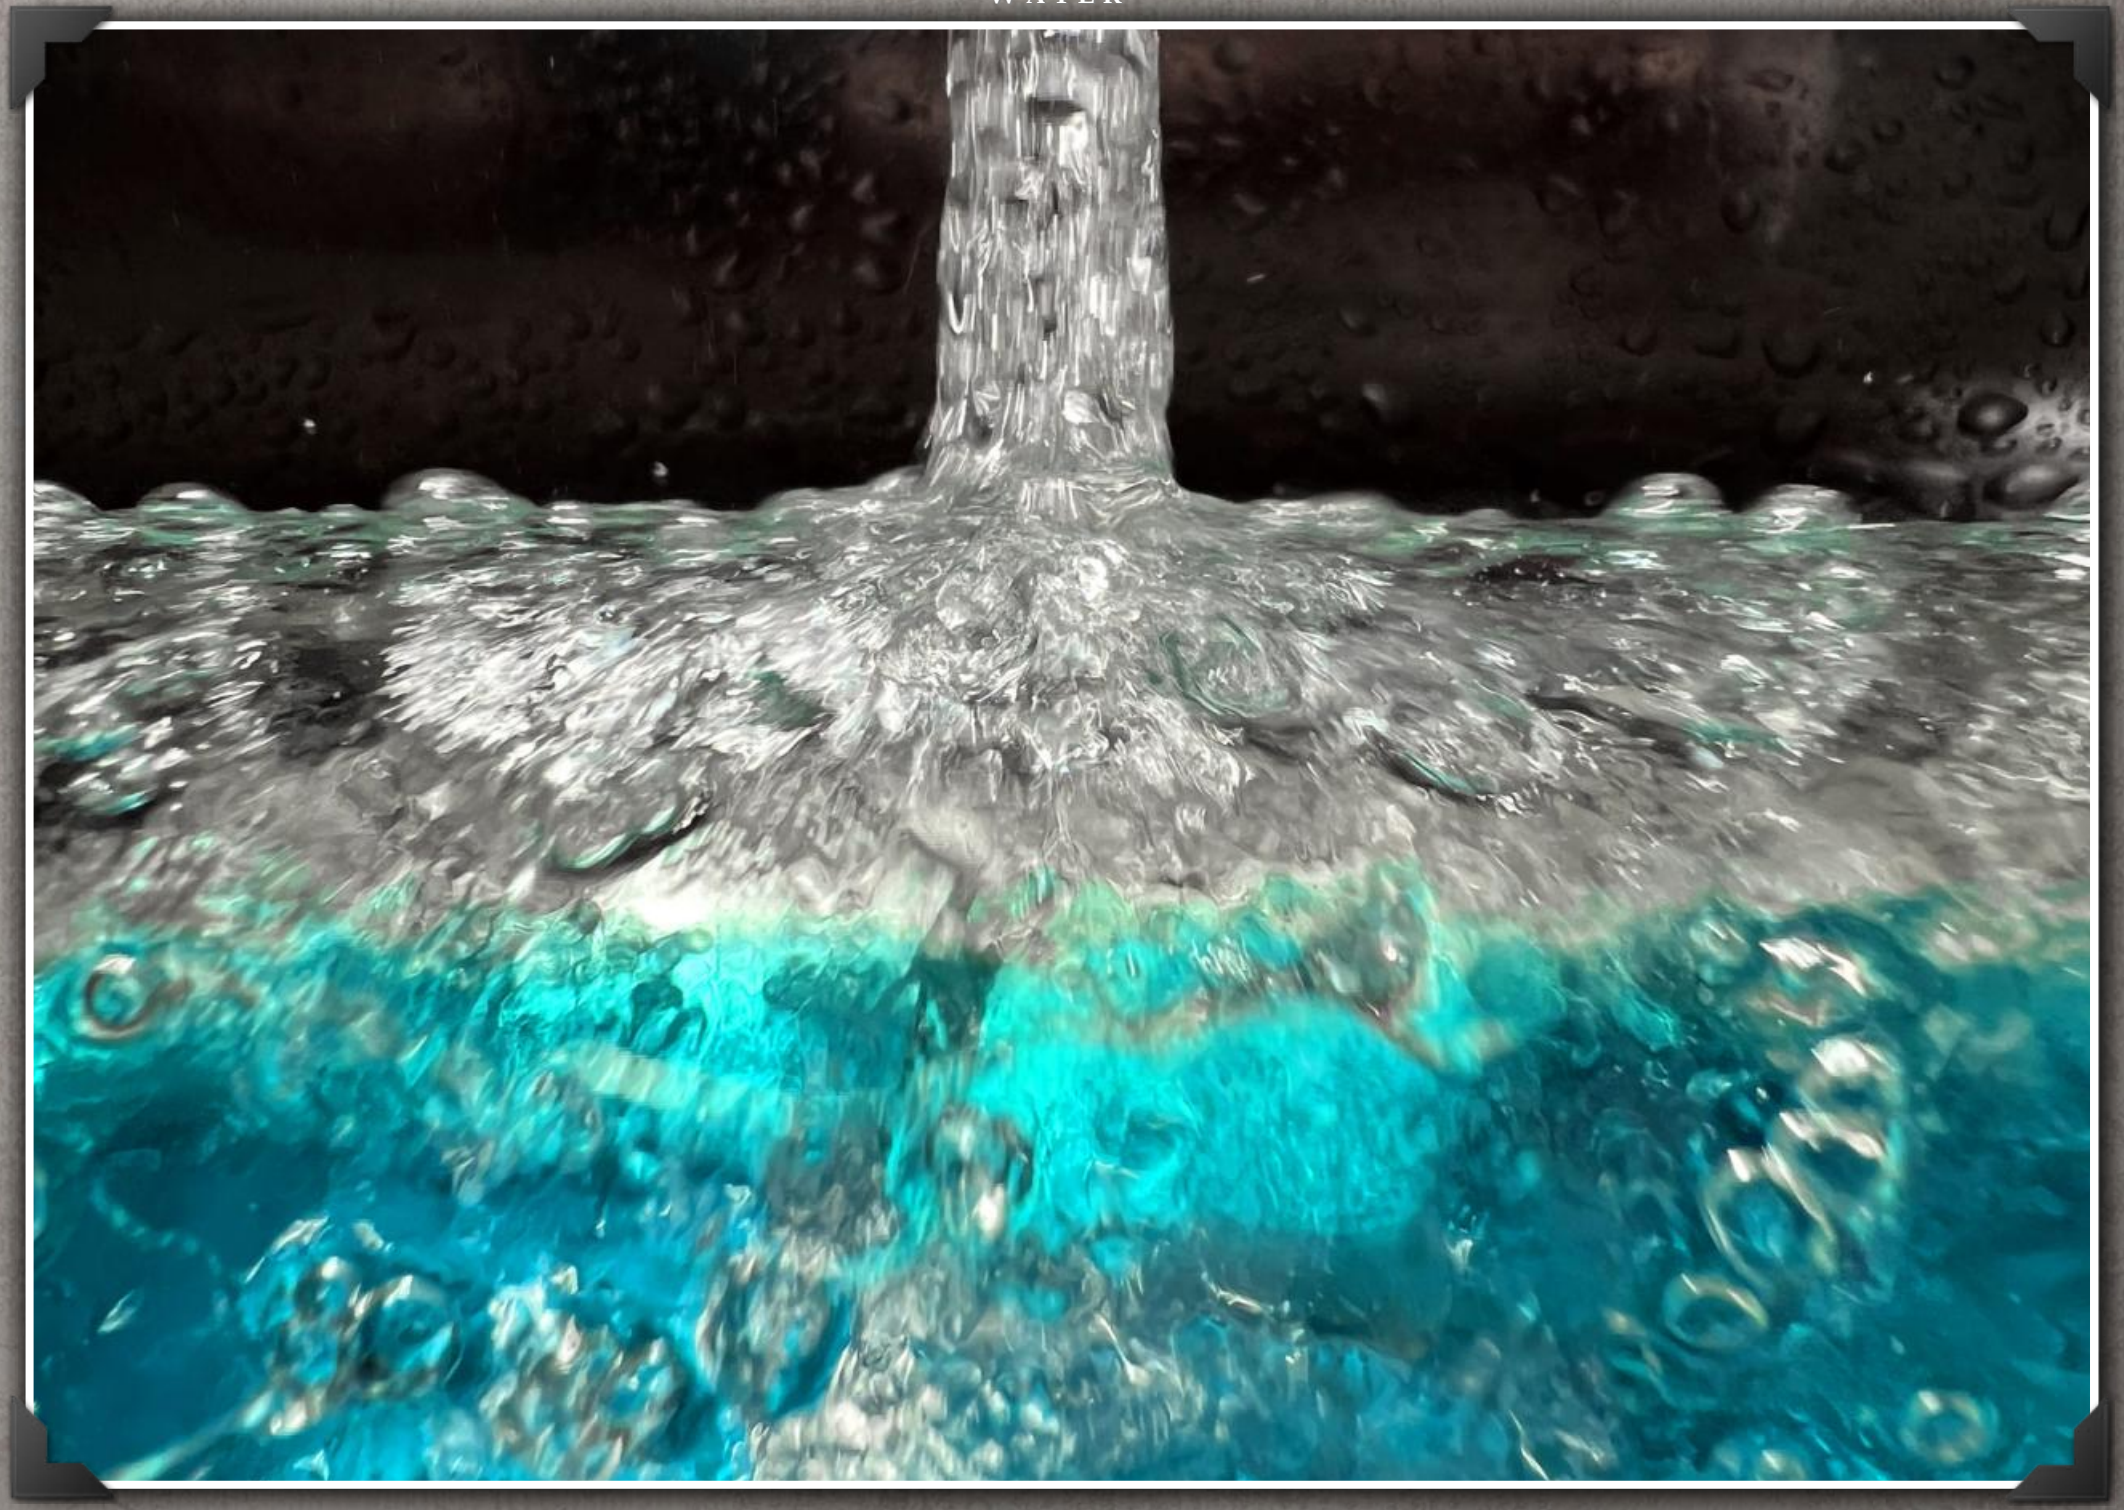
- David & Debbie Hibbert -

Water is the most abundant mineral
on Earth and the most vital for life.

This small ePic captures a few
images of water in different
states for your enjoyment.

CONTENTS

WHAT IT WATER?	BILLABONGS
RAIN	LAKES
DROPLETS	SEAS
SPRINGS	OCEANS
CREEKS & STREAMS	SNOW
RIVERS	ICE



WATER

A transparent, odourless, tasteless and nearly colourless edible chemical substance.

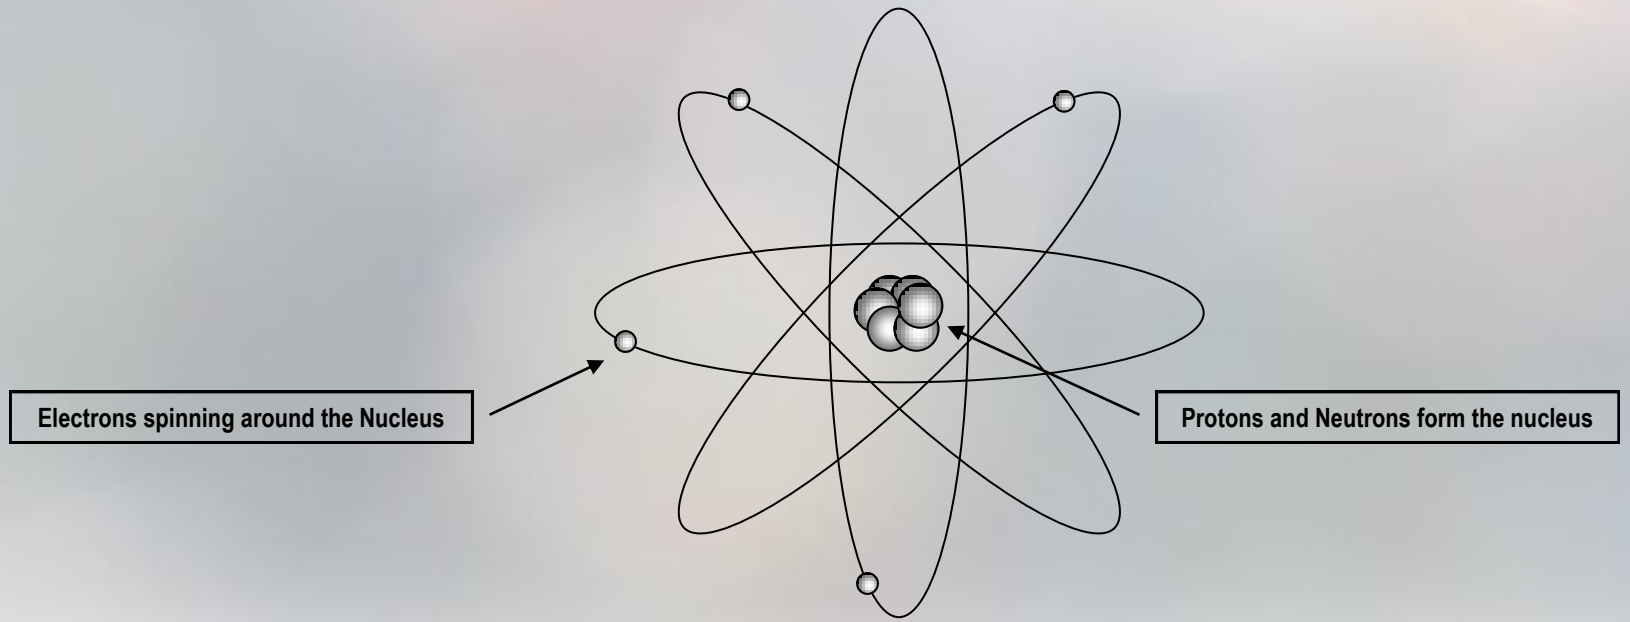
Water is found in areas such as springs, rivers and lakes, after it falls from the sky as rain or snow.

H_2O

Water is made up of three Atoms which form a water Molecule. When trillions of these molecules group together they give us visible water.

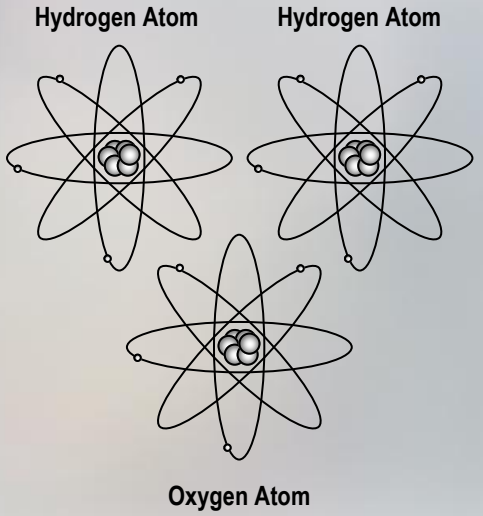
ATOM

The smallest particle of matter that is known to exist. Atoms are made up of electrons, protons and neutrons.



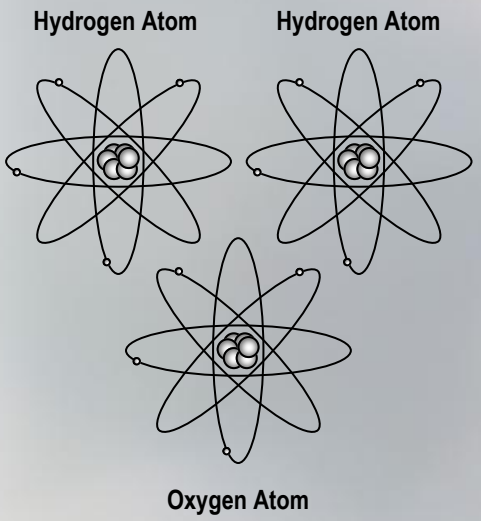
MOLECULE

Two or more atoms bond together to form a molecule. These are also known as chemical compounds. Different combinations of atoms form different compounds.



CHEMICAL

The name of the chemical compound for water is H_2O. This means water is made from two hydrogen atoms and one oxygen atom bonded together.



H_2O

RAIN

Water Falling from the Sky

Rain Clouds

Rain

Water Droplets

Water Droplets

SPRINGS

Water Seeping or Flowing from the Ground

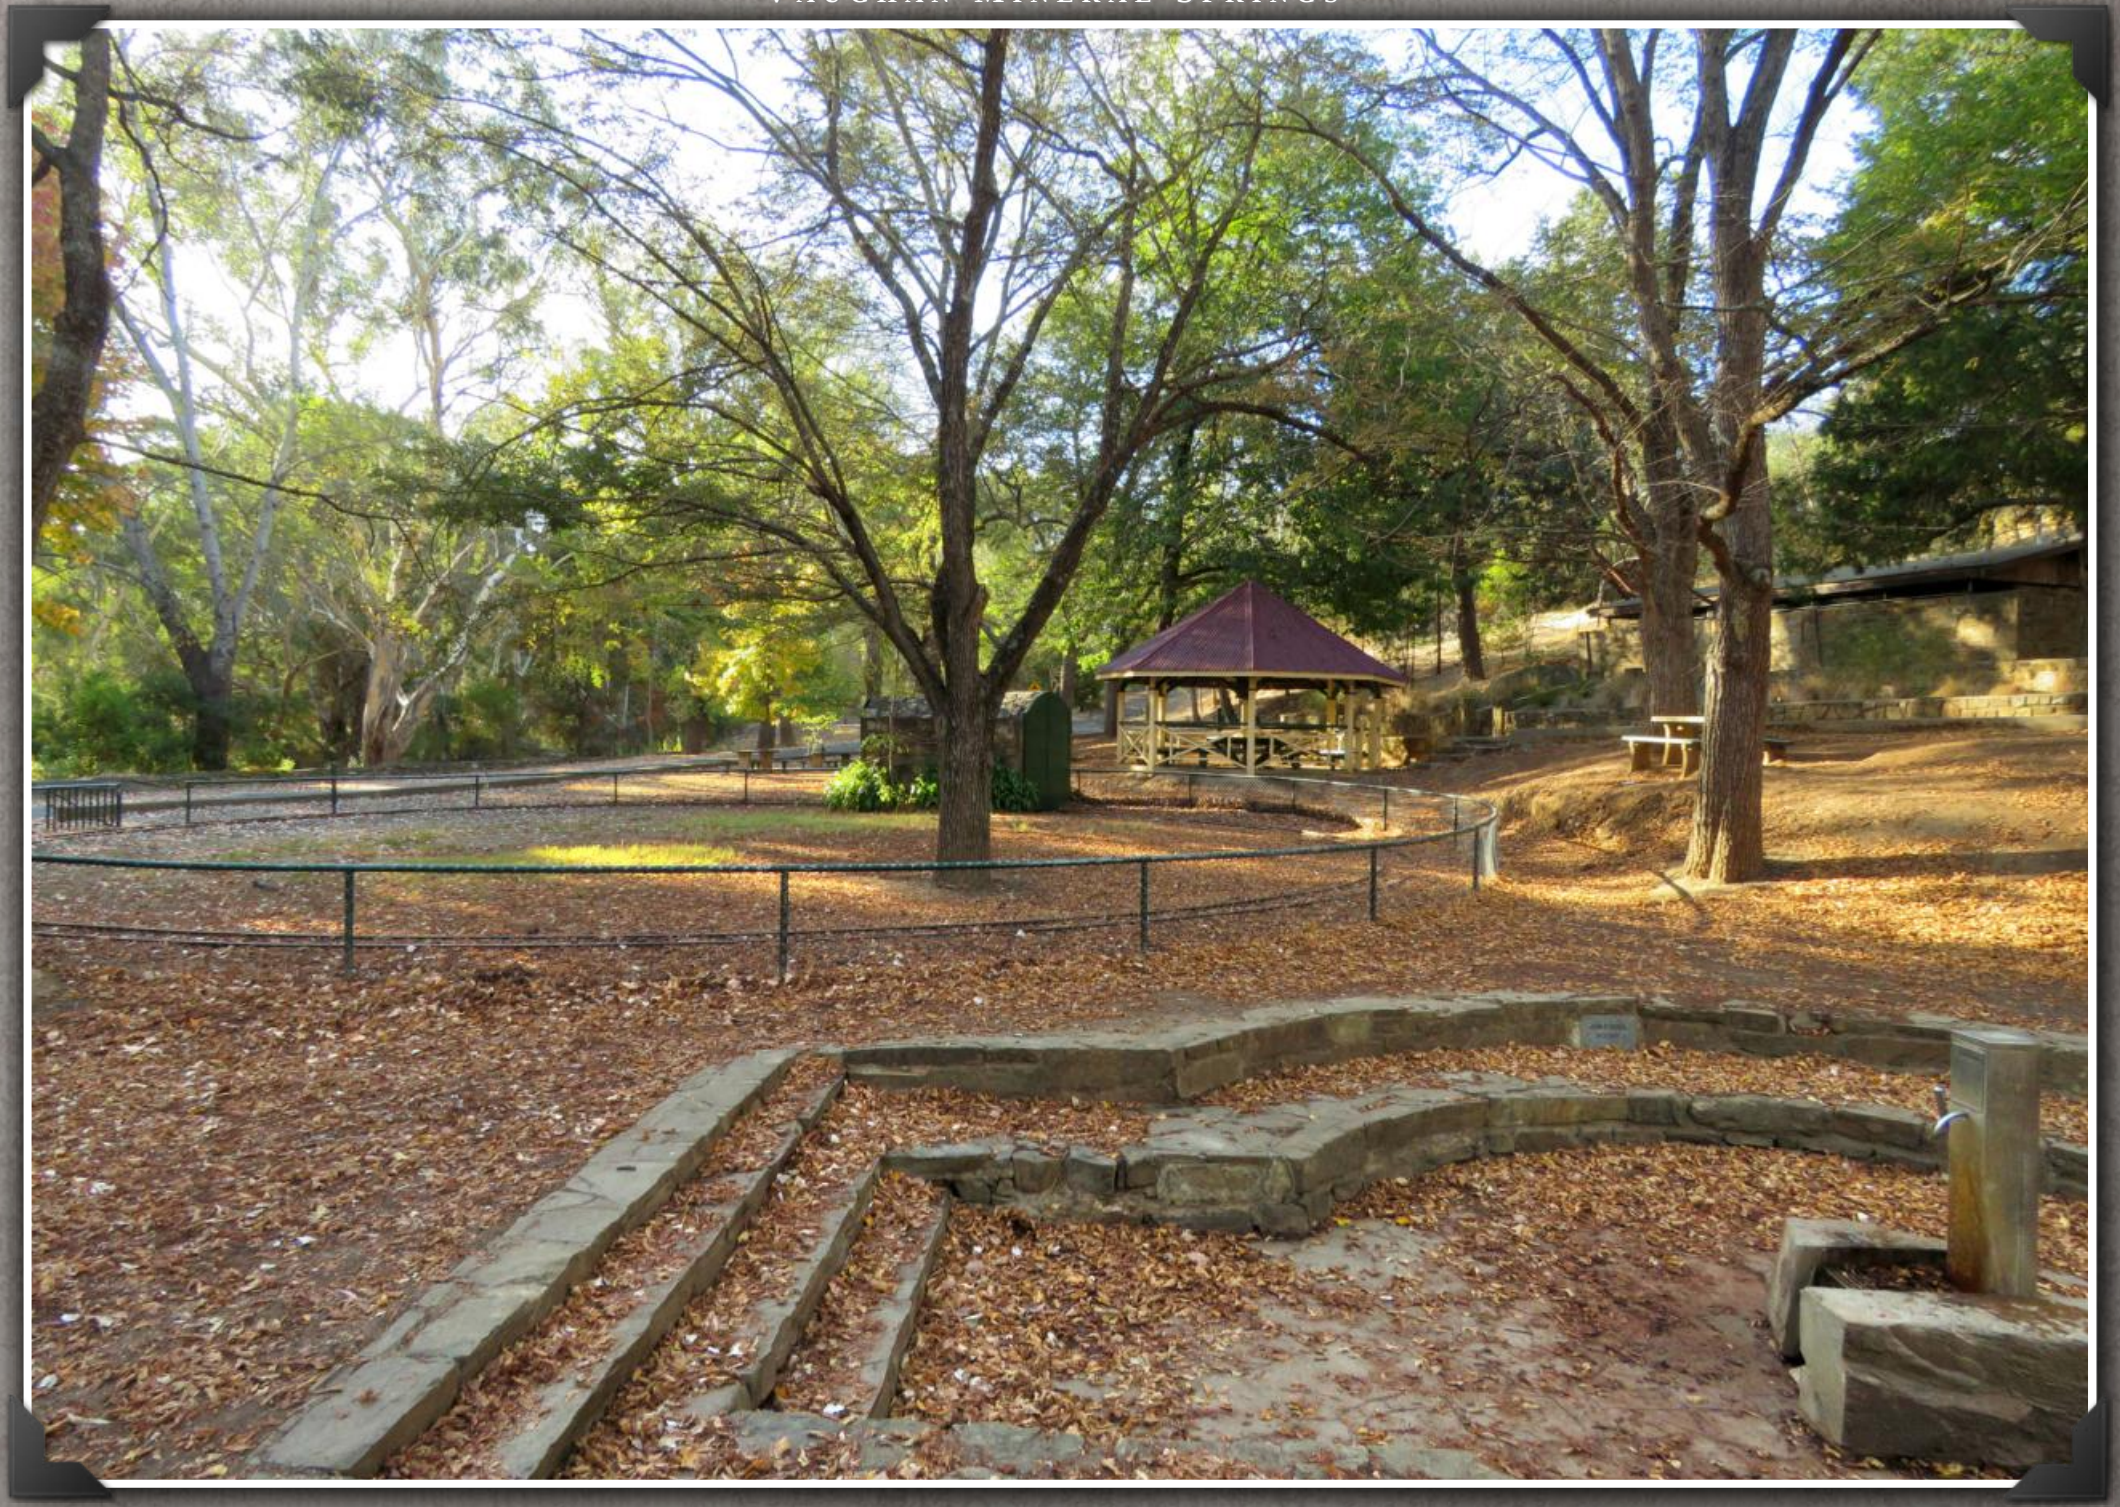
A Pond Fed by a Natural Mountain Spring

Highlands Bush Mineral Spring

A Slow Releasing Natural Country Spring

Natural Spring (centre) behind Sailors Falls

Vaughan Mineral Springs



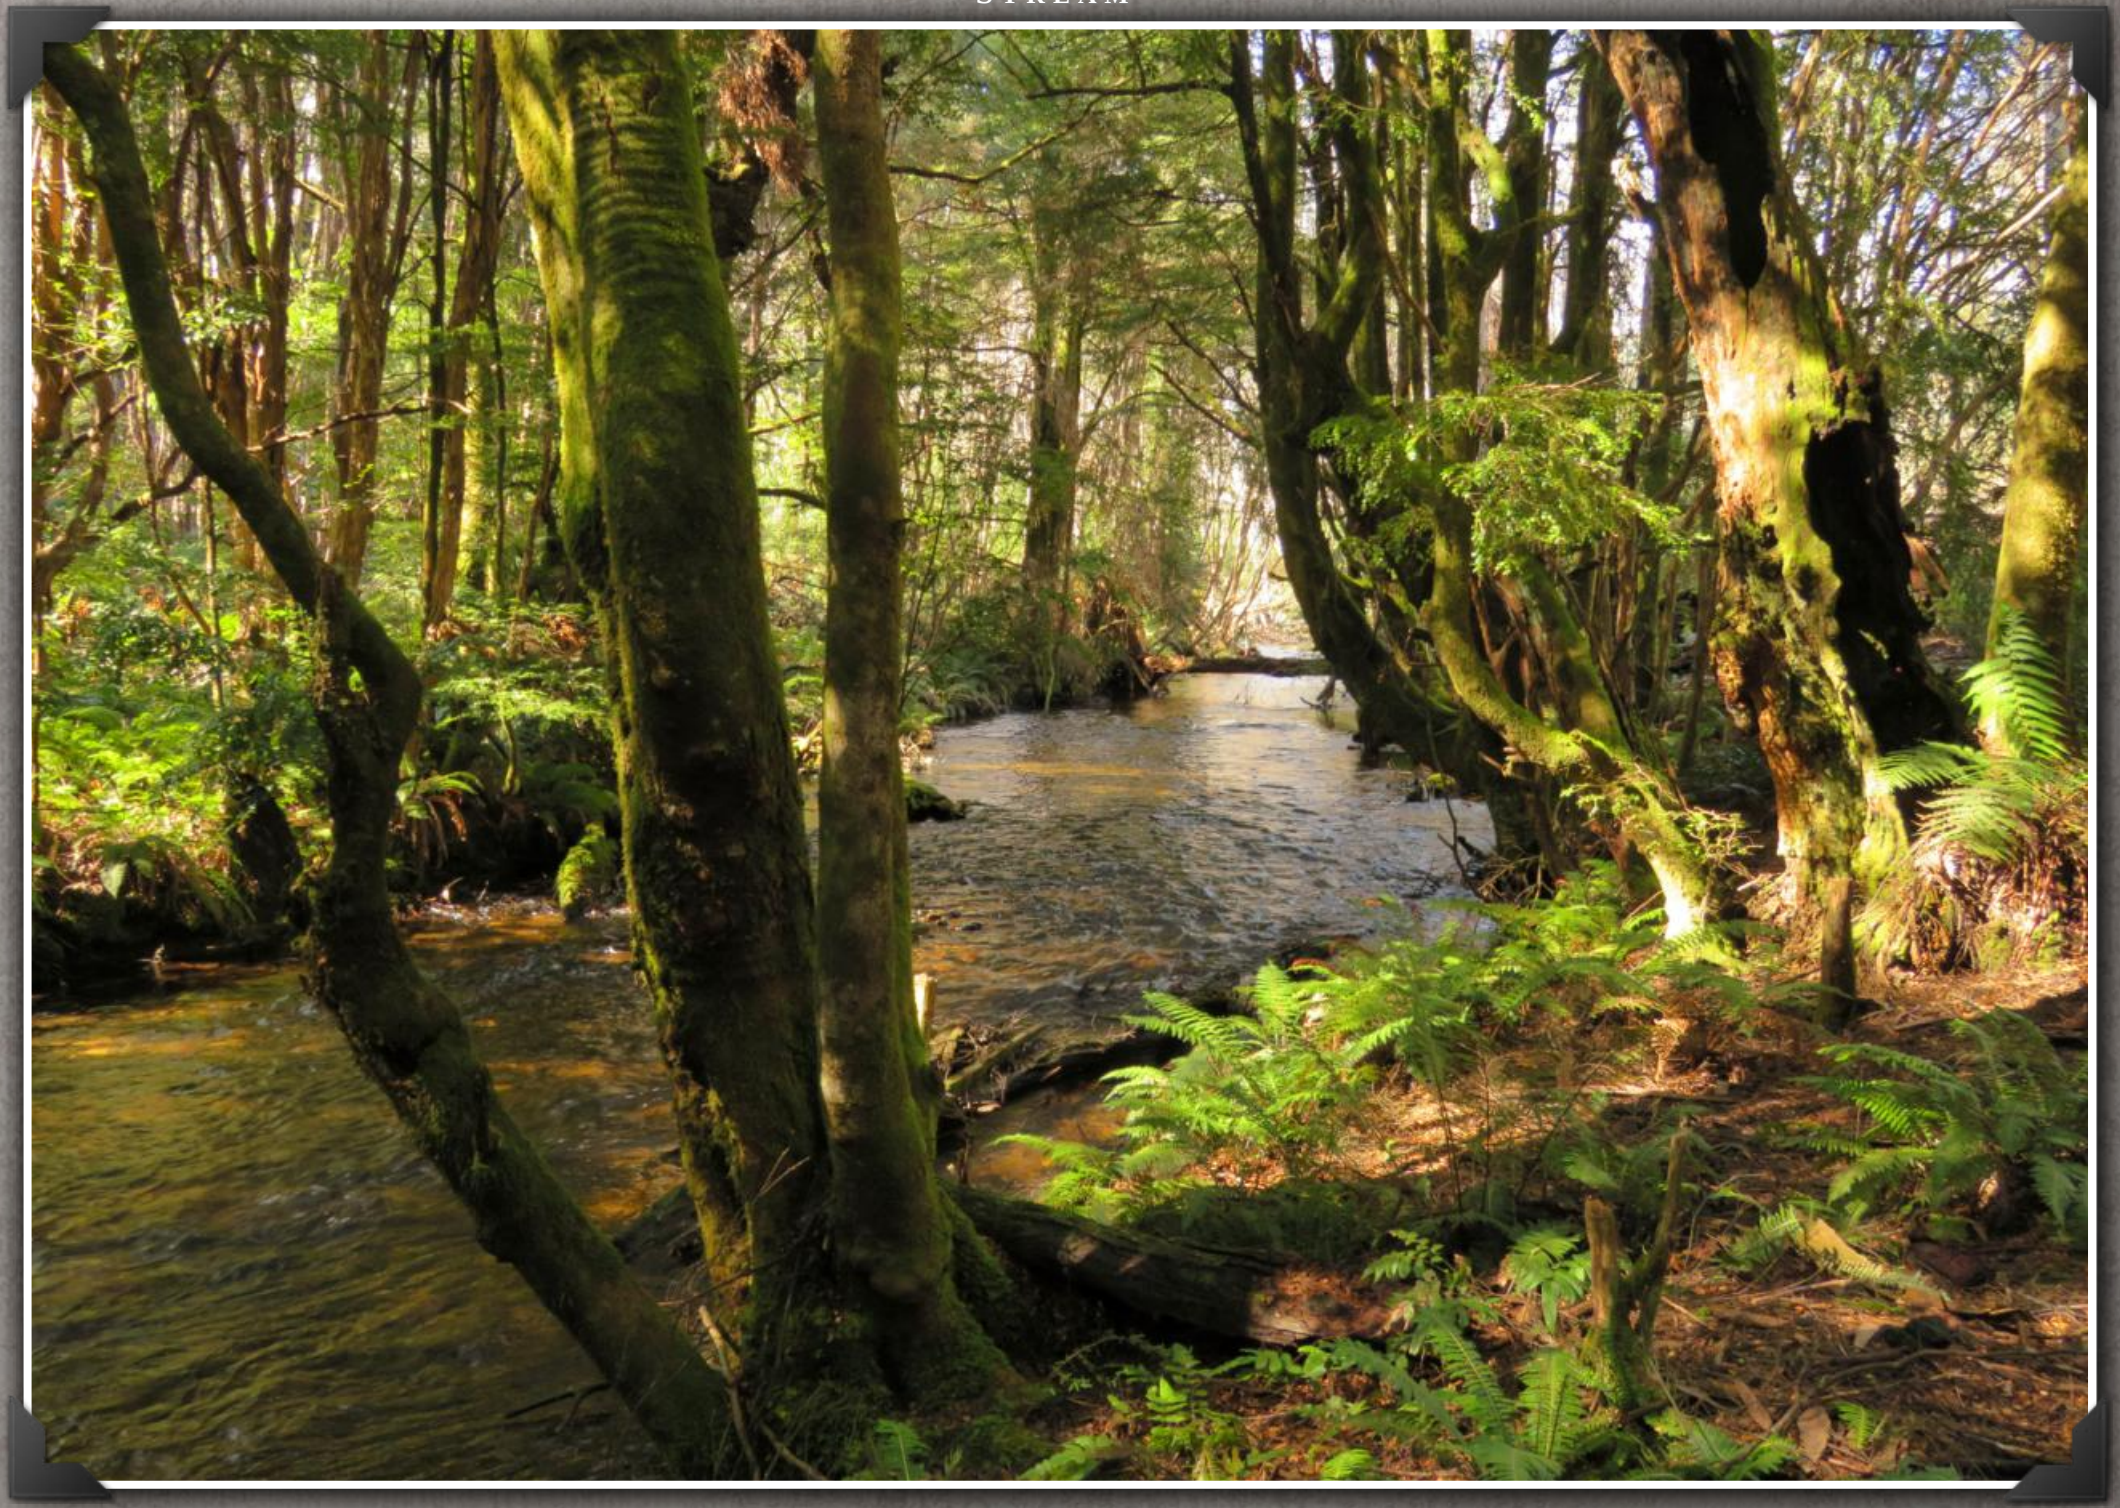
Small Spring amongst Granite Boulders

CREEKS & STREAMS

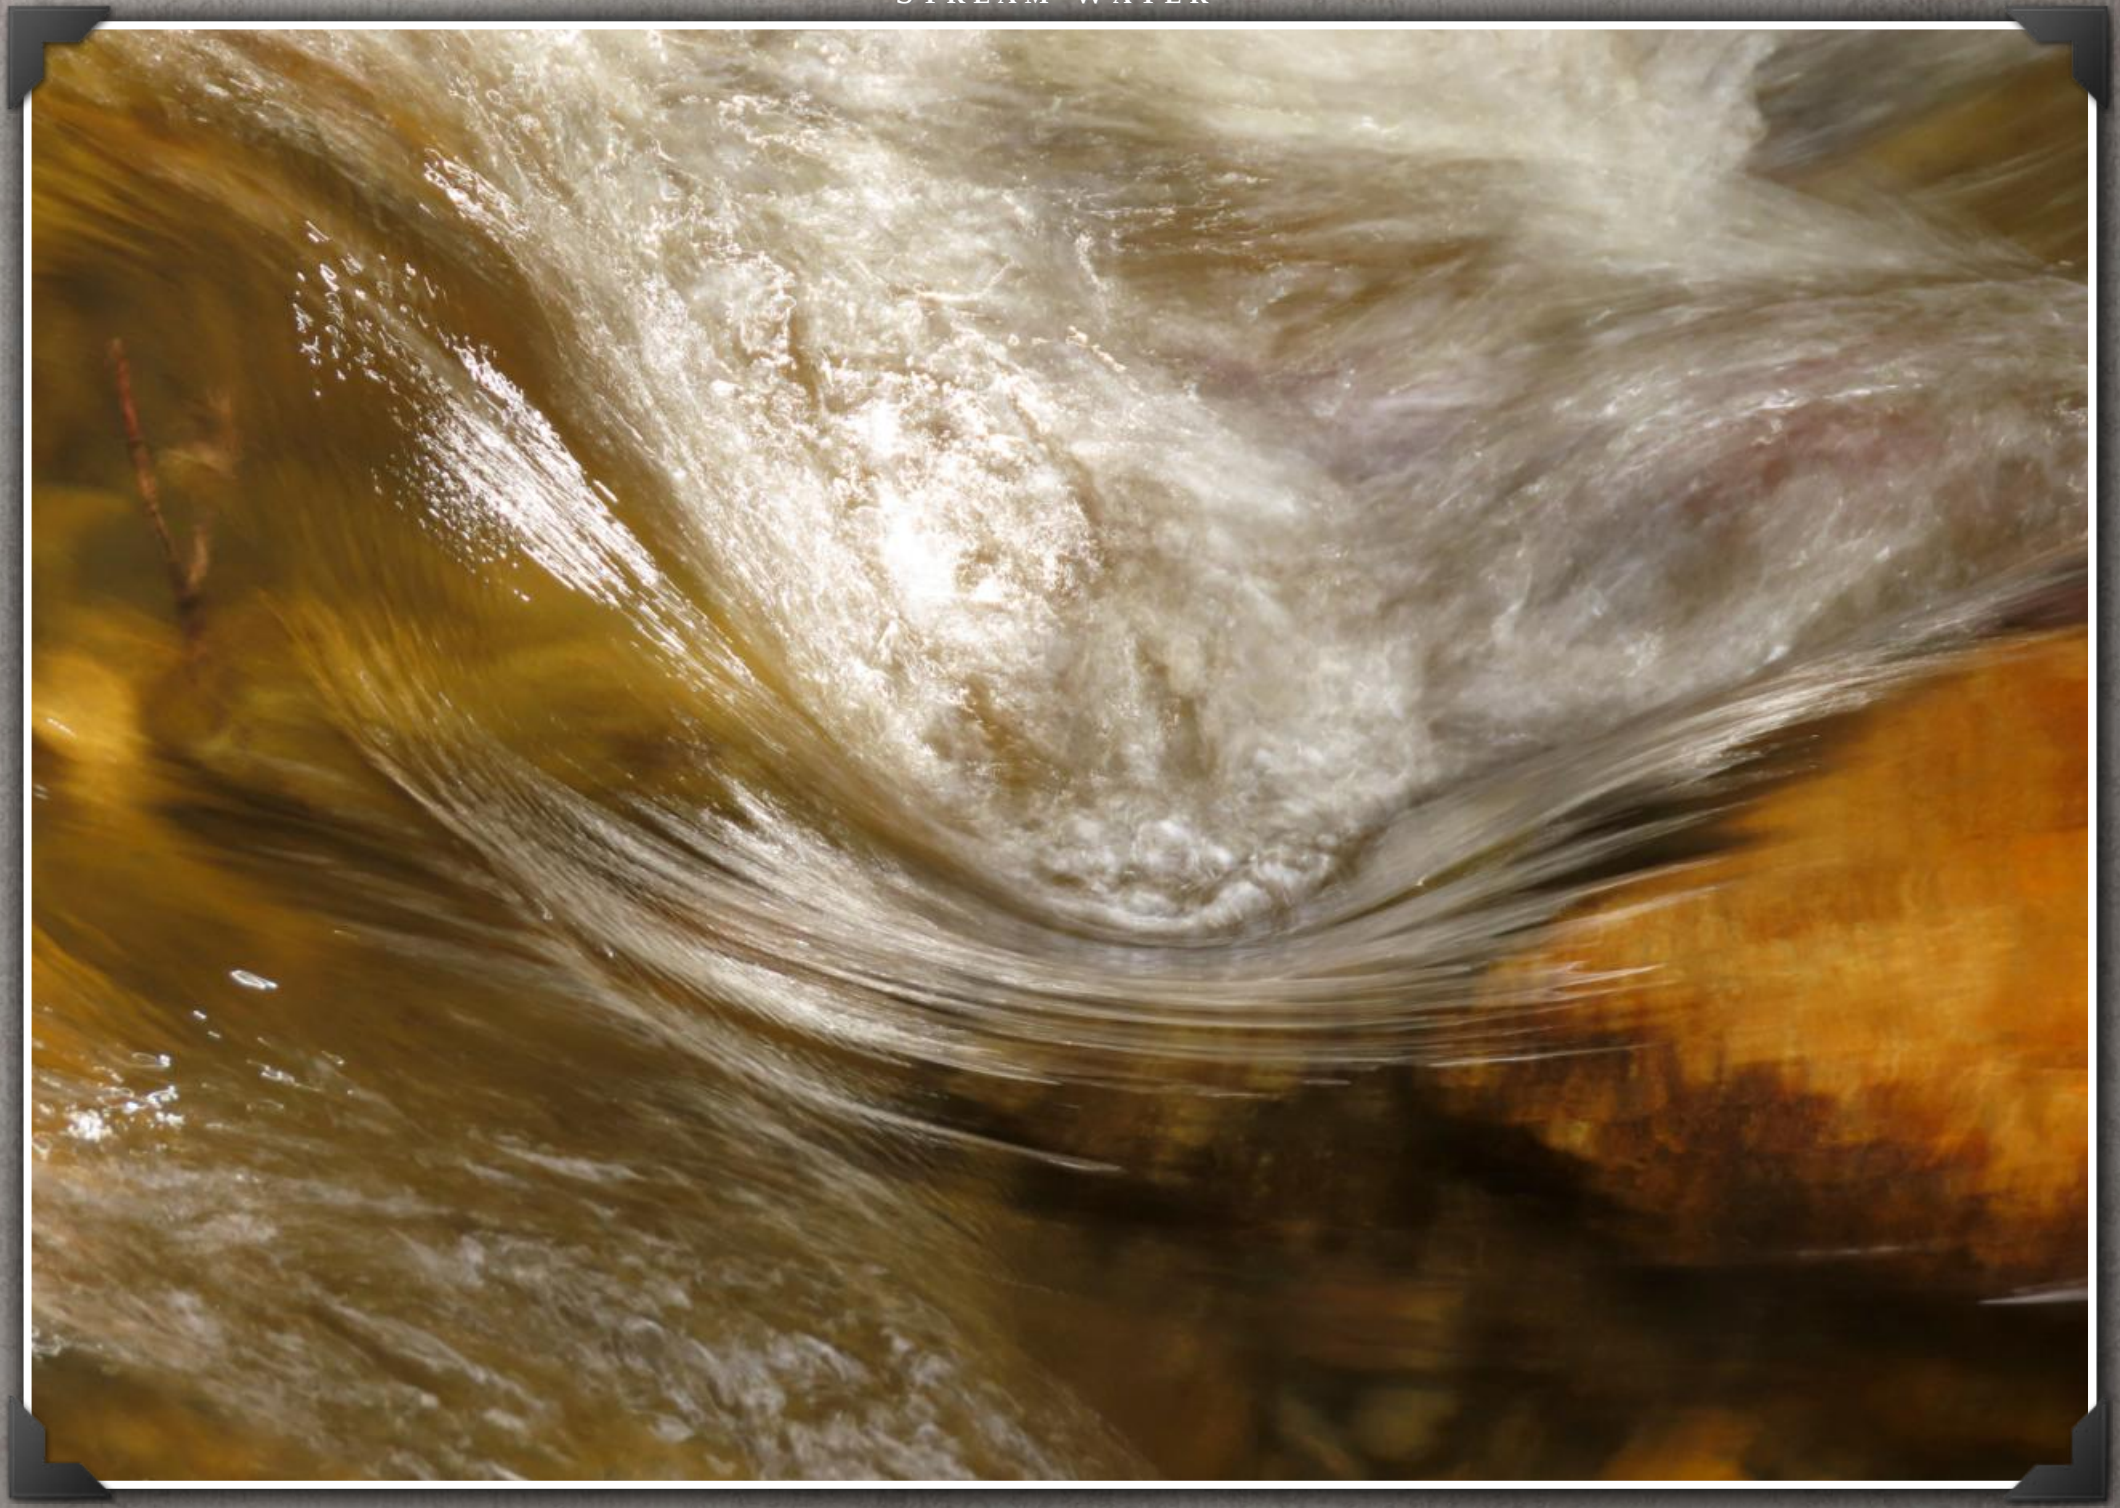
Waterways that are Smaller than Rivers

Stream

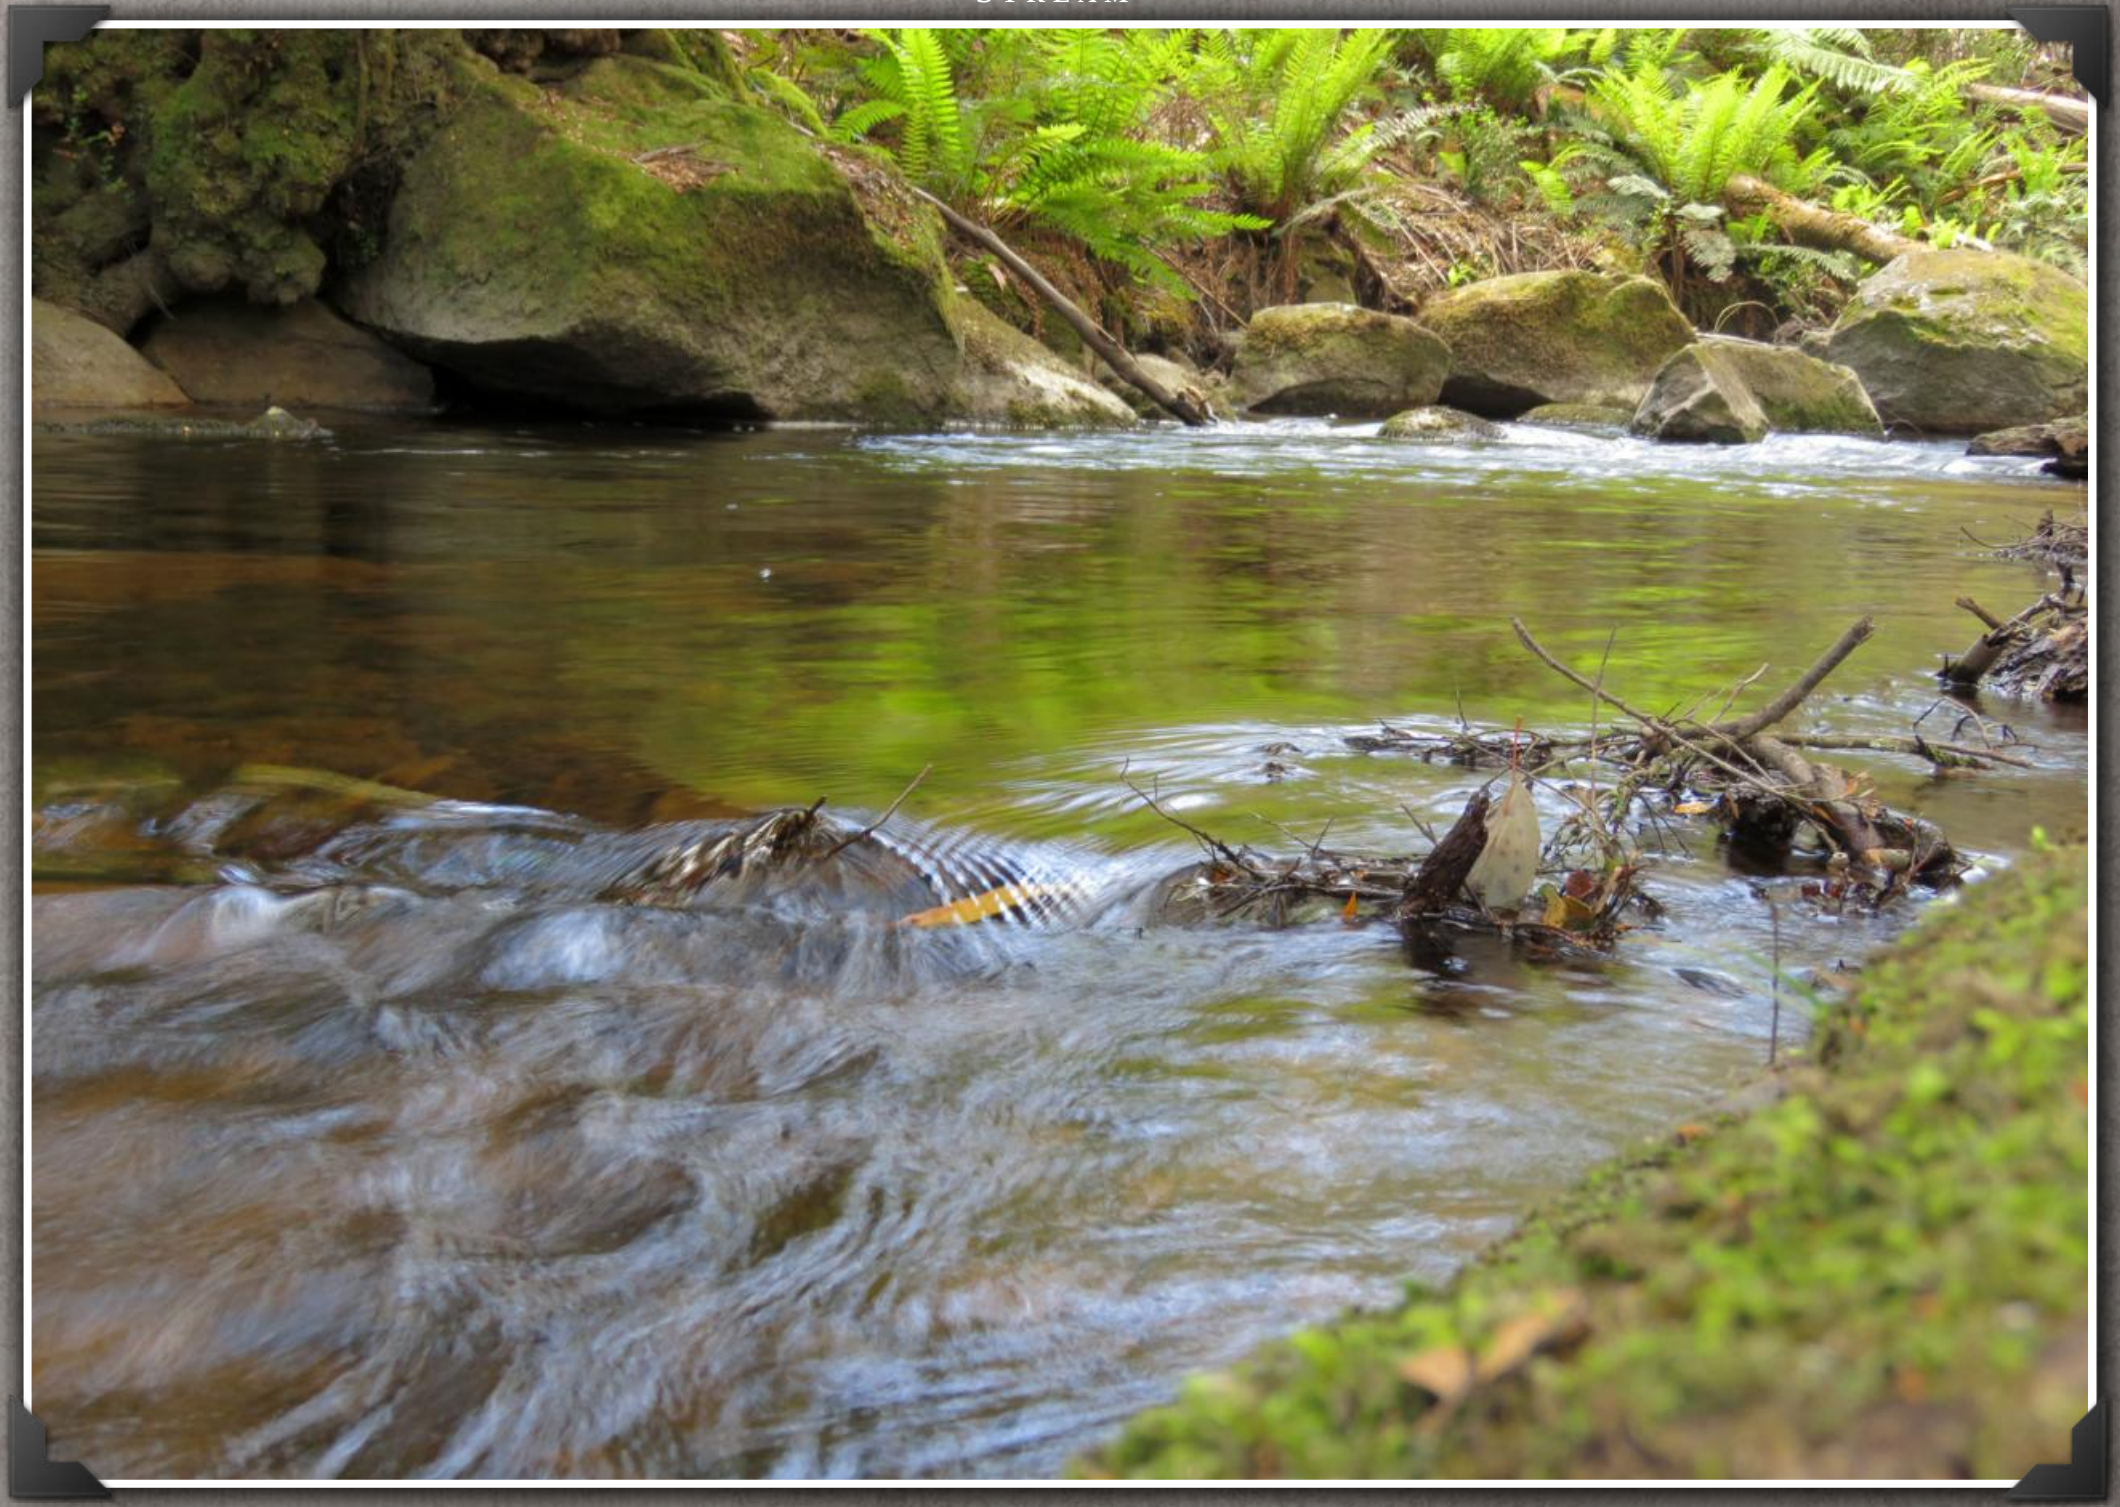
Stream



Stream Water



Stream



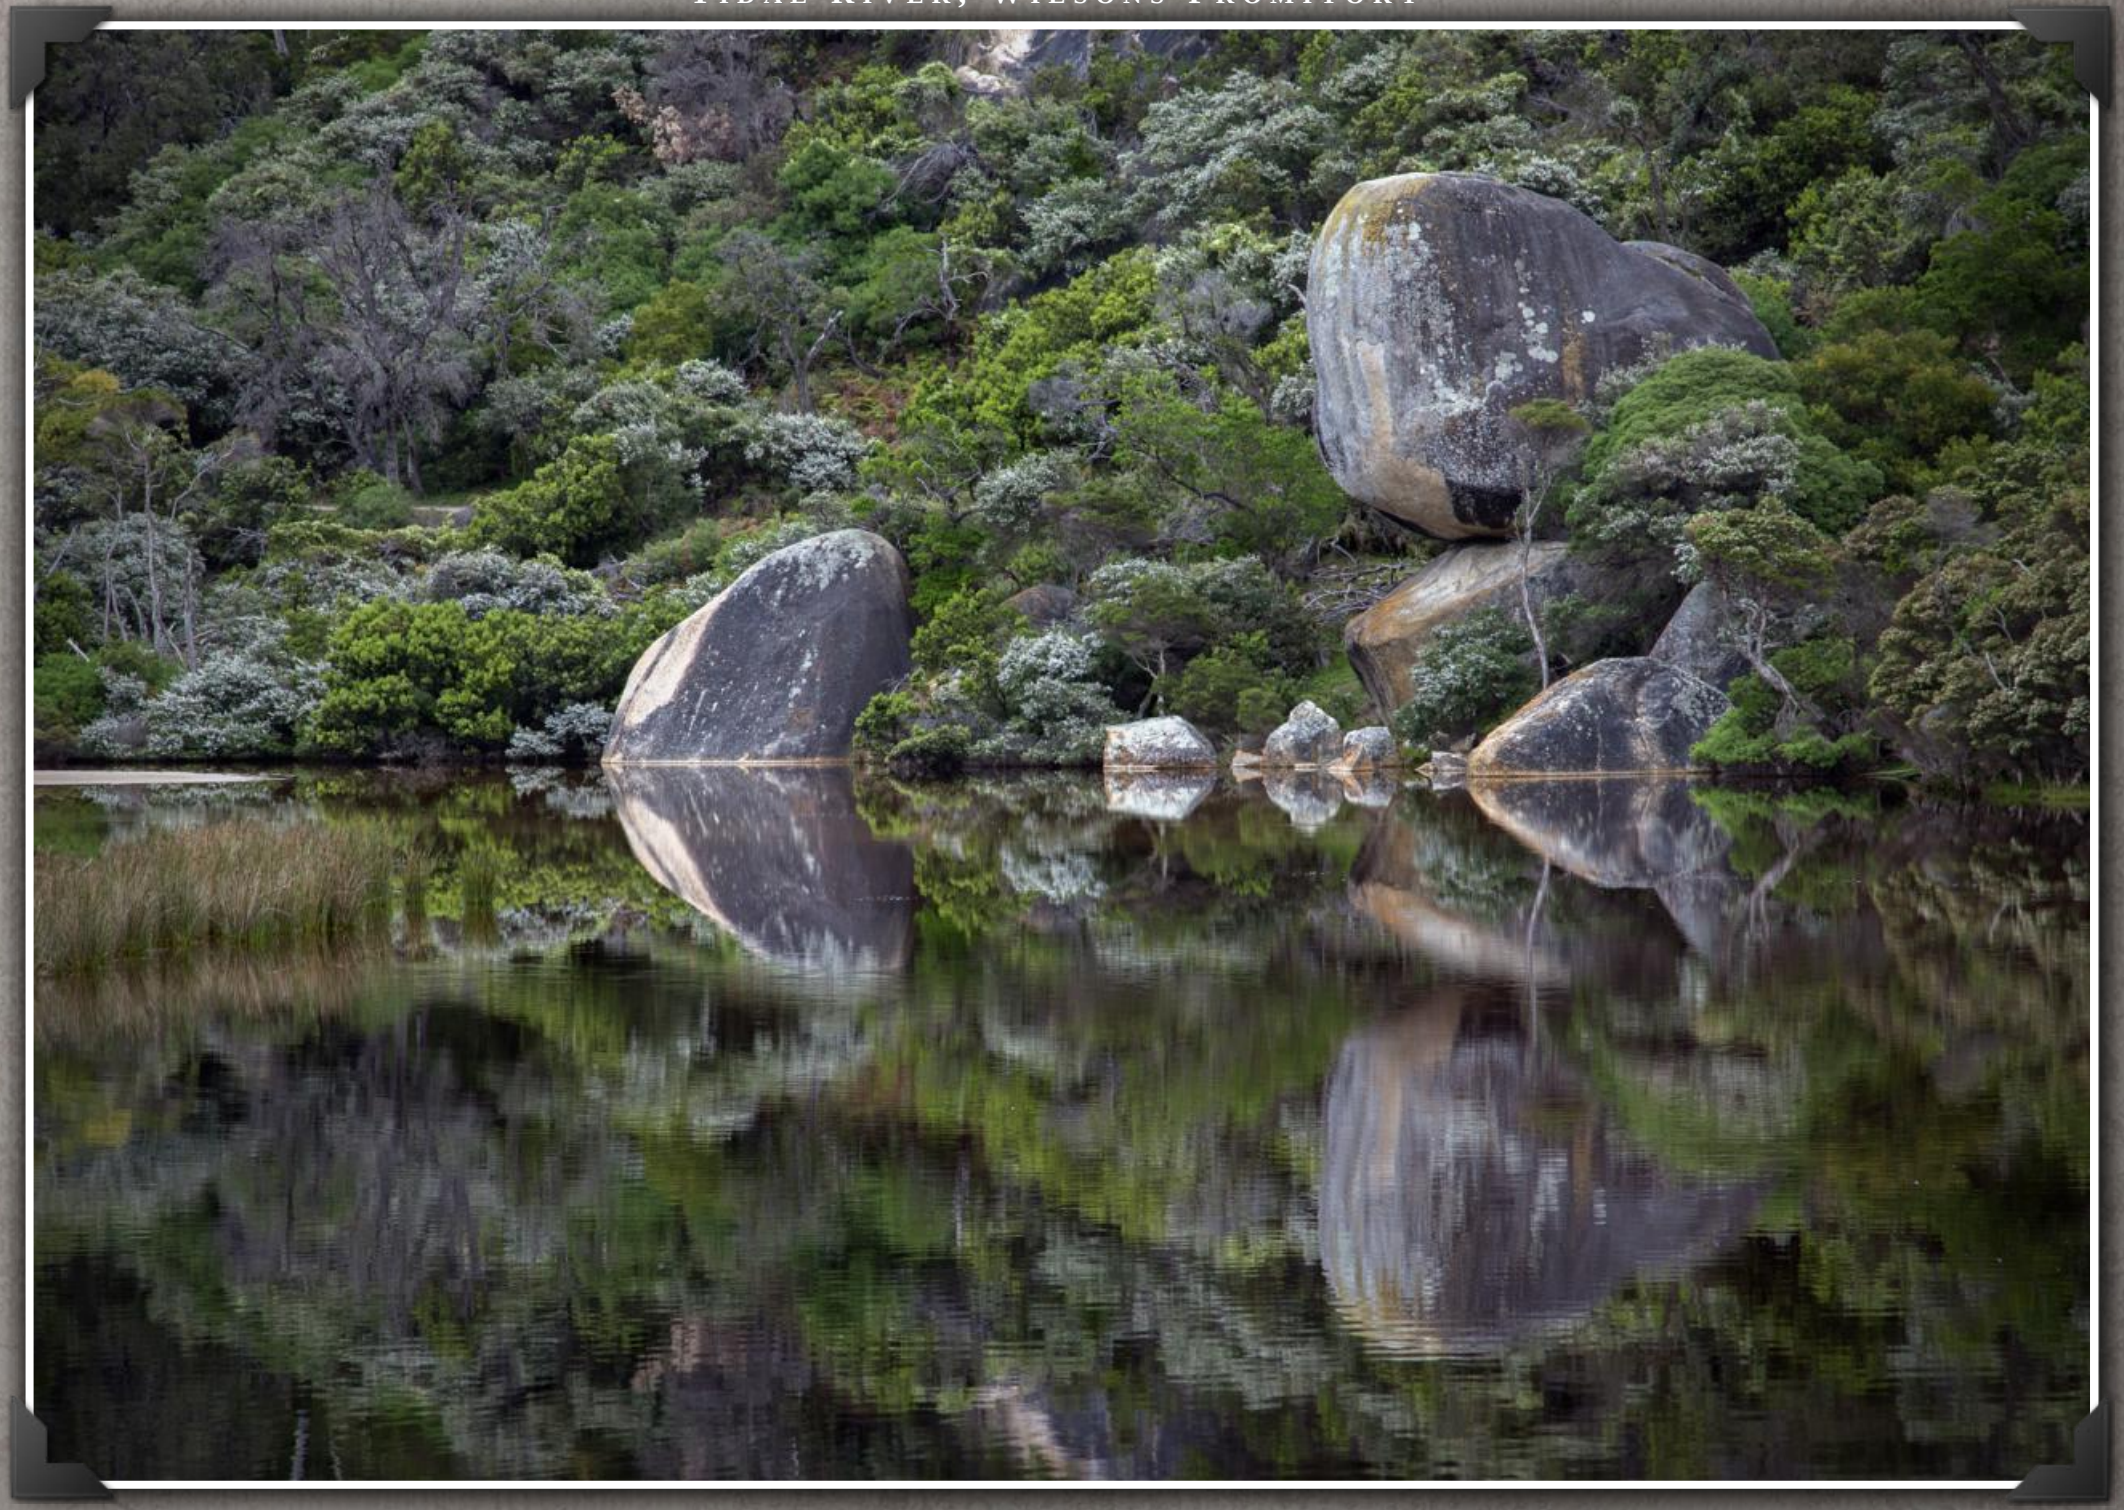
Creek in Flood

RIVERS

Larger Flowing Bodies of Water

Goulburn River, Thornton

Tidal River, Wilsons Promitory



Wollomombi Gorge, Wollomombi River, NSW

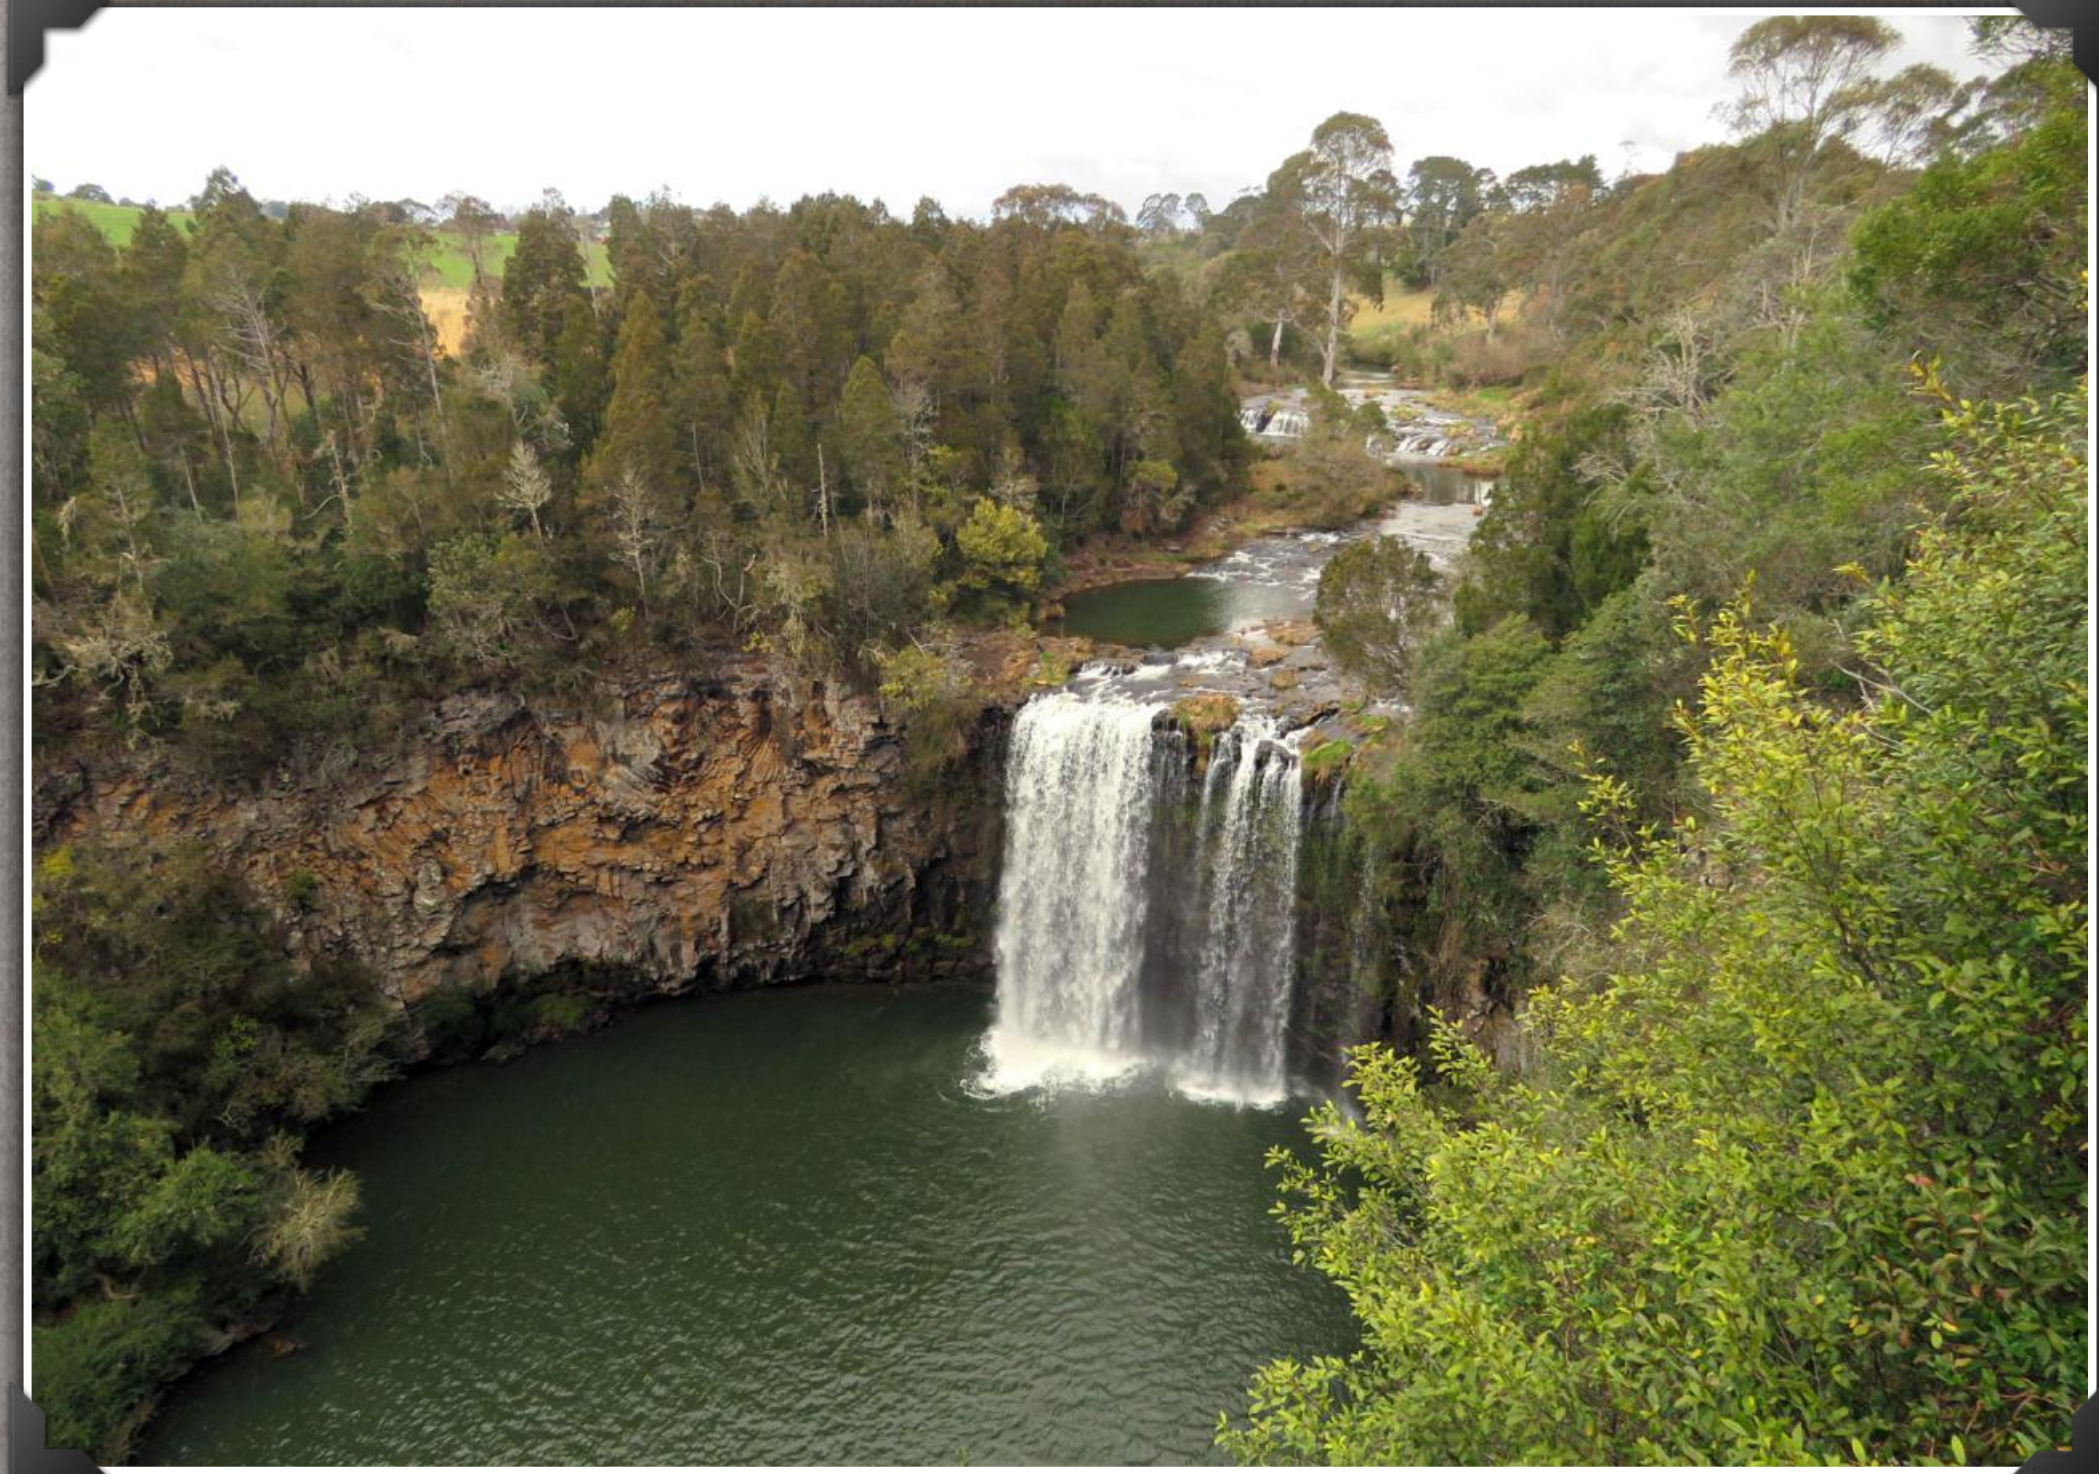
Murray River, Mildura

LENGTH

Australia's longest single river is the Murray River. When the longest tributary of each river is taken into account, the Darling River is the longest.

Victoria's longest single river is the Goulburn River.

Dangar Falls, Bielsdown River, NSW



LAKES

Inland Bodies of Water Surrounded by Land

Lake Eildon

Thomson Lake

Bellbridge Bridge over Lake Hume

Sugarloaf Reservoir

SEAS

Large Bodies of Water Close to Land

Wreck Beach

Shipwreck Coast, Great Ocean Road

The Pinnacles, Phillip Island

Shipwreck Coast, Great Ocean Road

Shipwreck Coast, Great Ocean Road

Marriners Lookout, Apollo Bay

OCEANS

Extra Large Bodies of Water further from Land

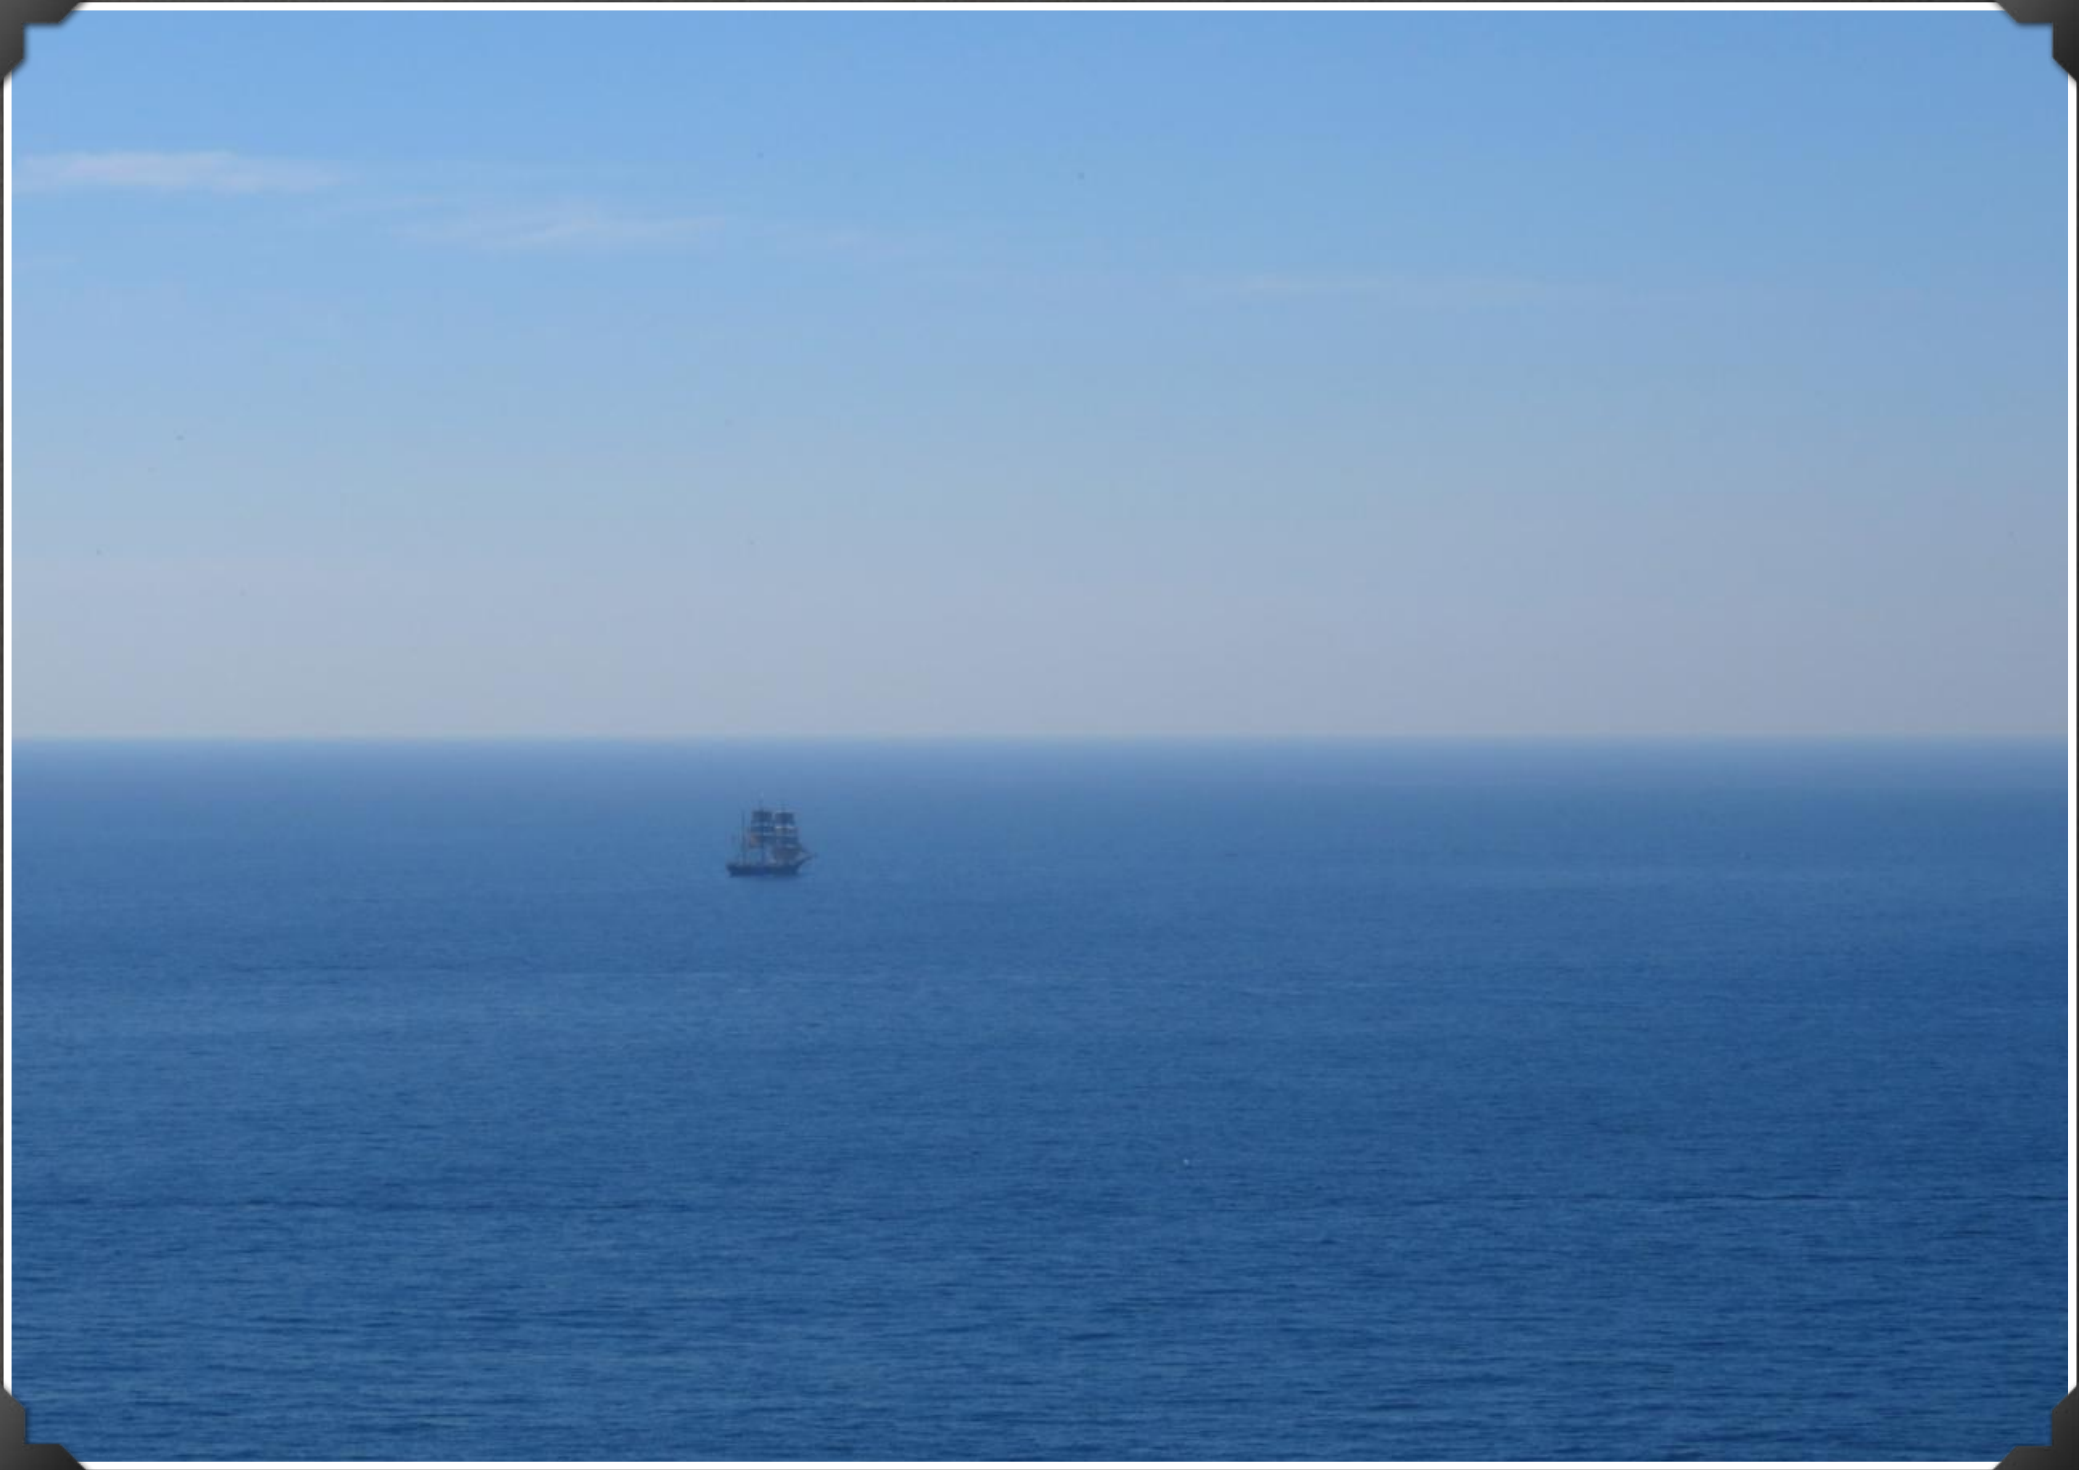
Sunrise Ocean Scene

Morning Ocean Scene

Sunny Ocean Scene

Windy Ocean Scene

Ship on the Ocean



SNOW

Frozen Water

Snowman

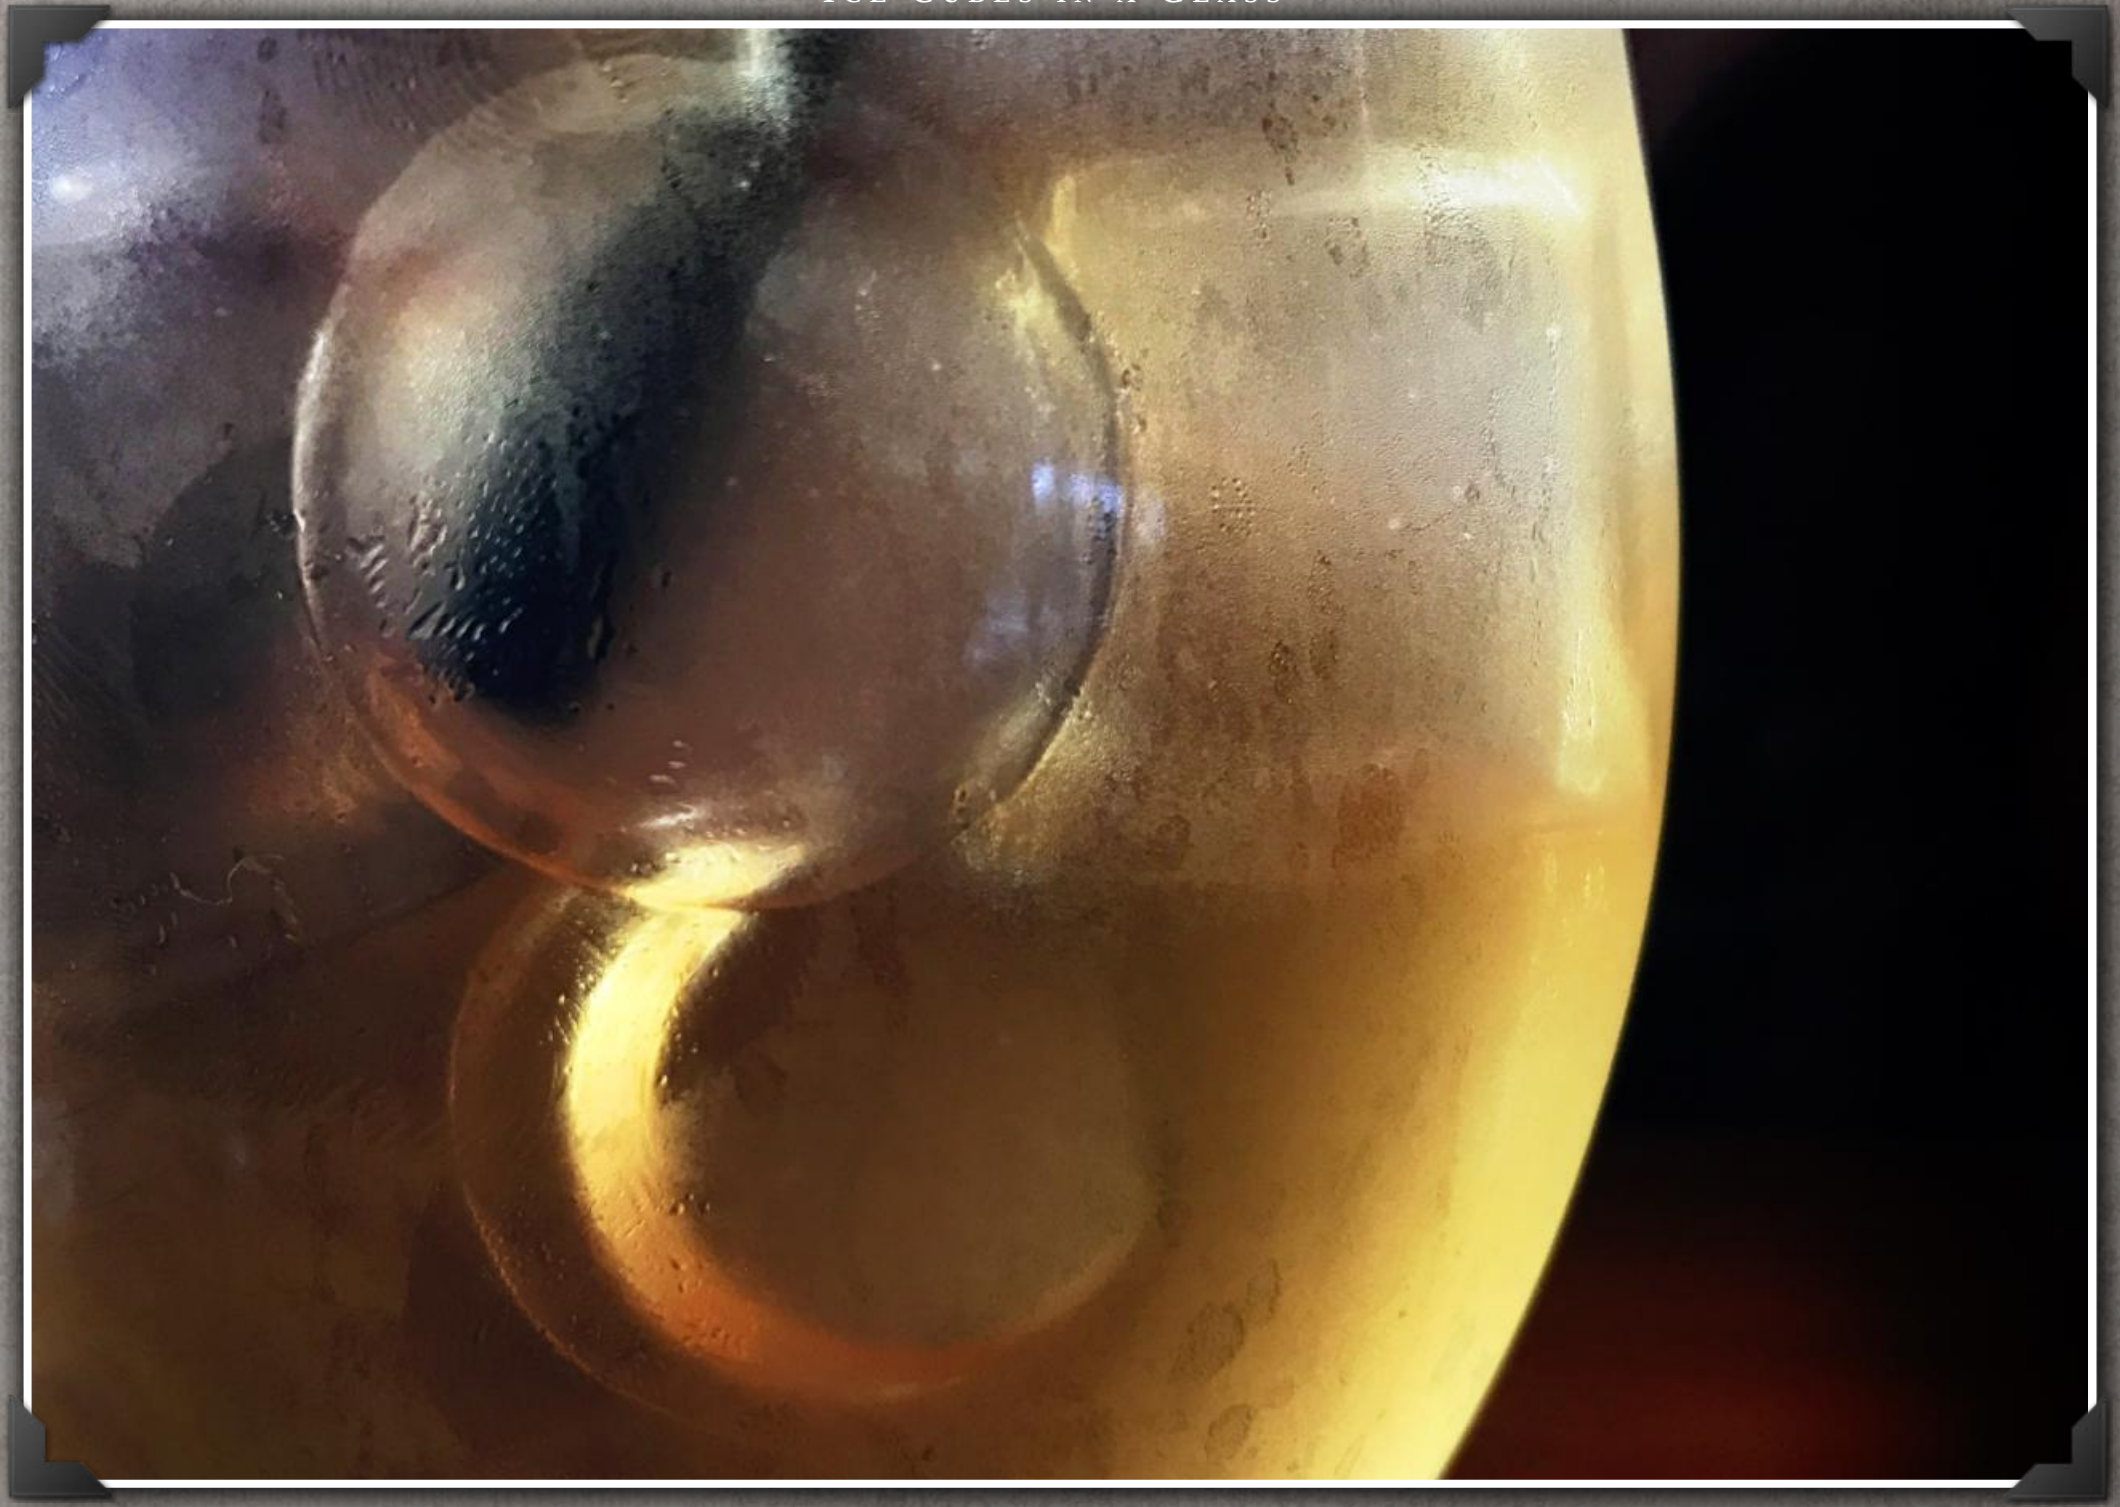
SOLID AND GAS

Water freezes when it is cooled below 0° Celsius and boils when heated to 100° Celsius. When boiling, water becomes steam.

ICE

Frozen Water

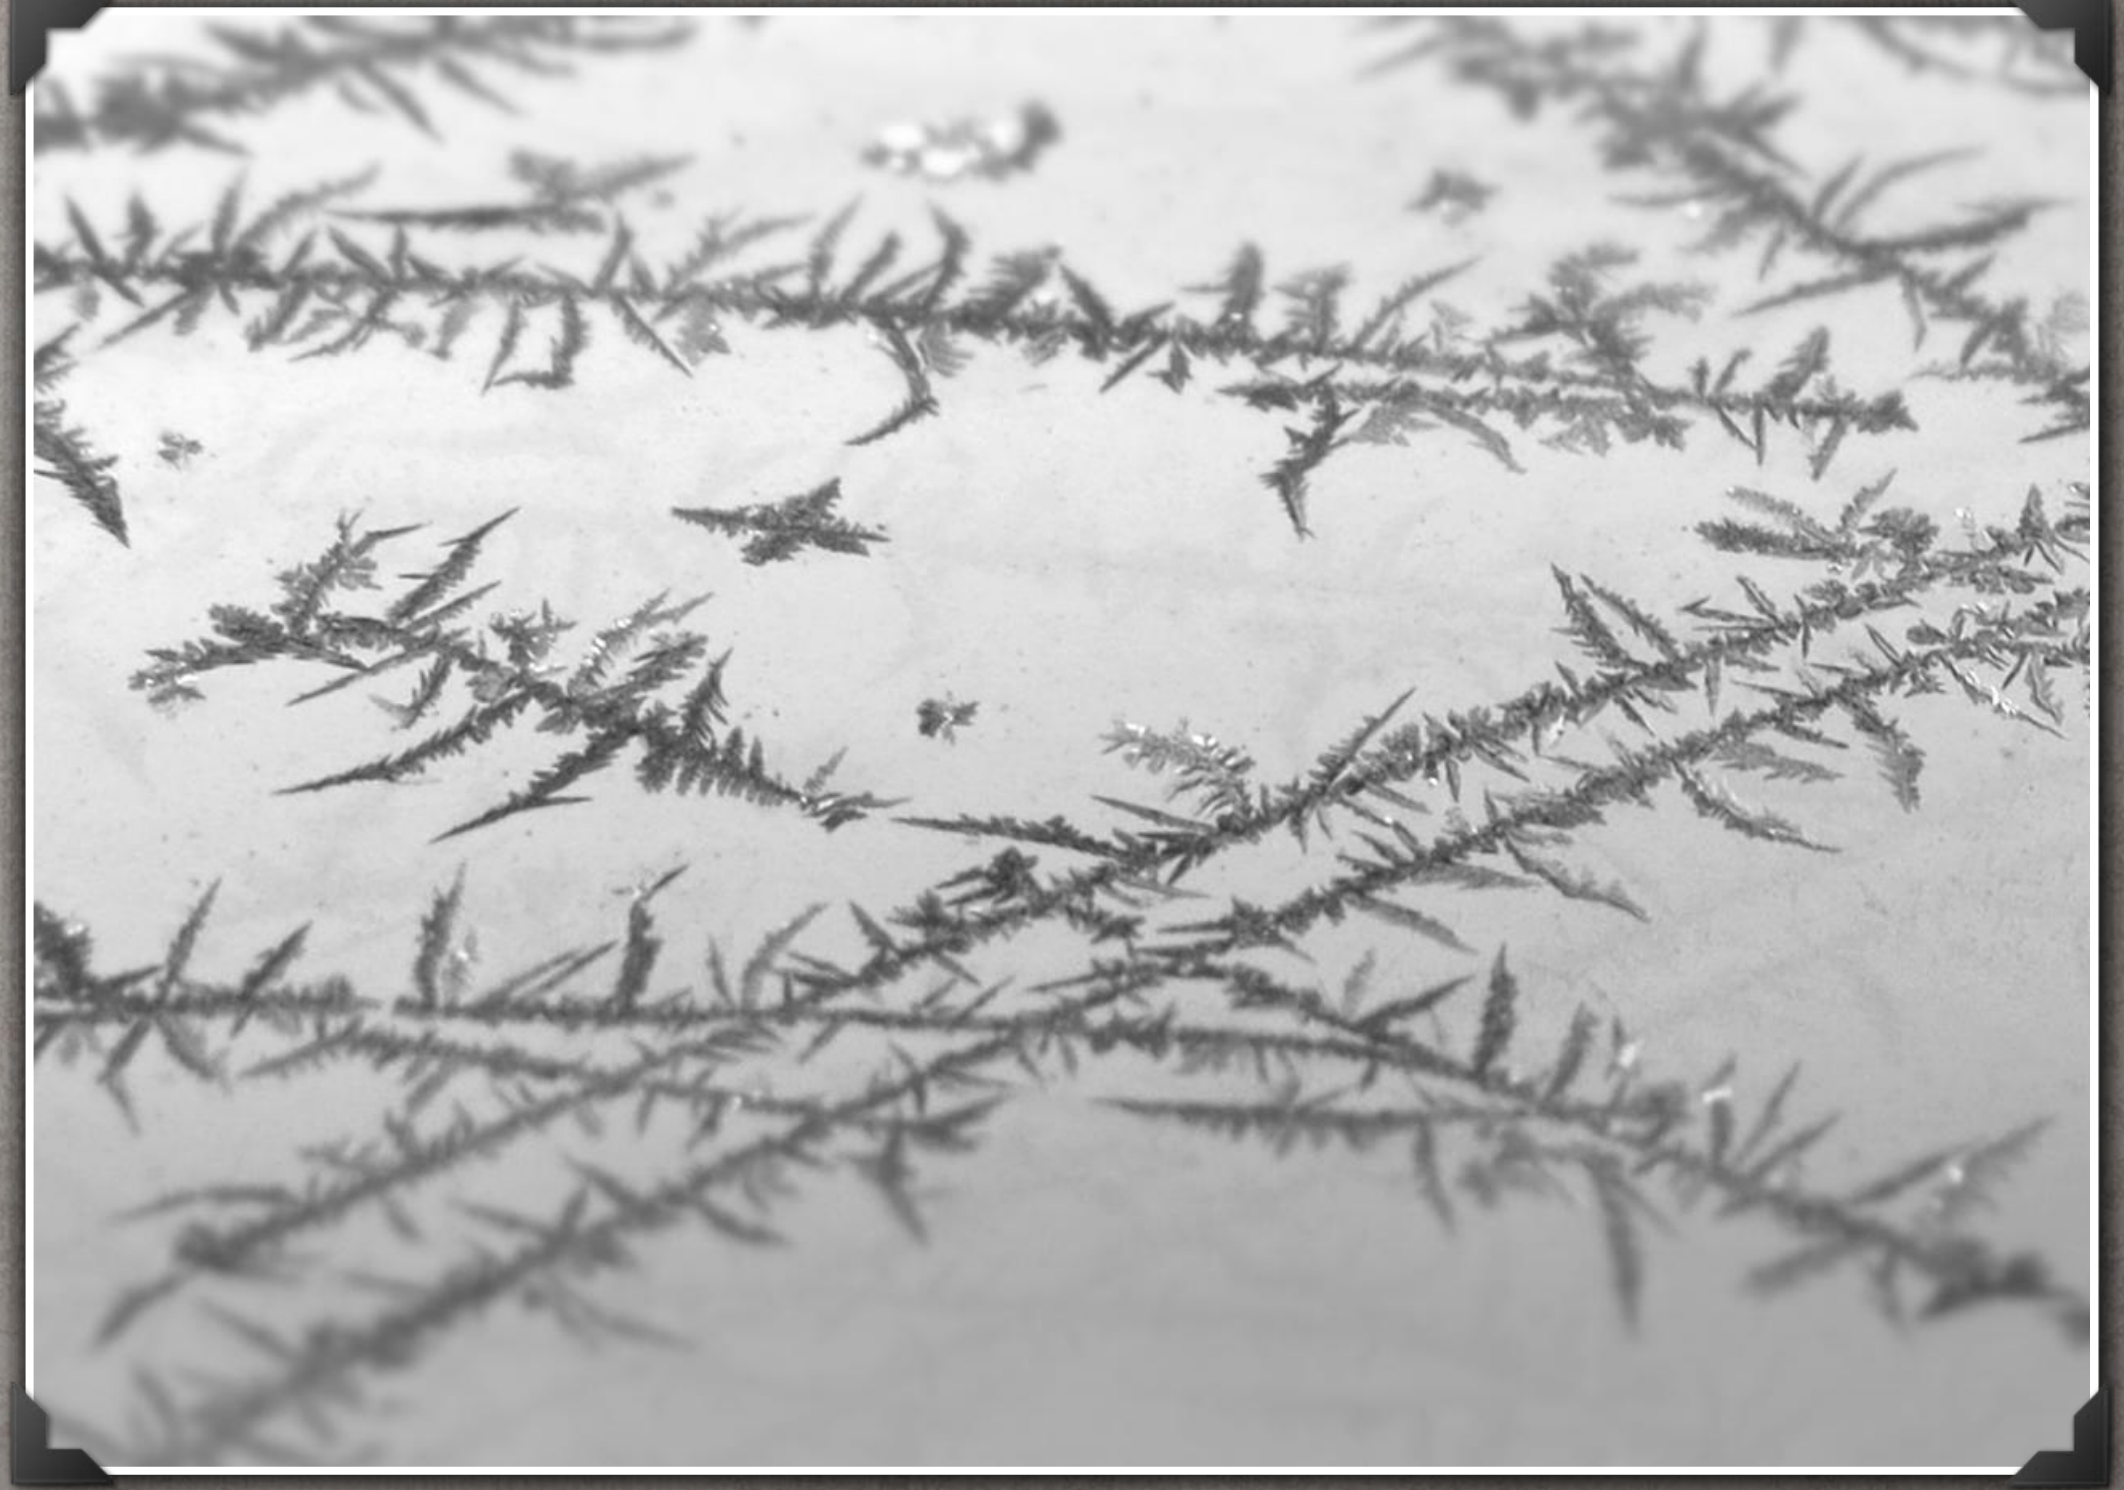
Ice Cubes in a Glass



Ice Crystals

Frozen Water

Window Ice



FUN WITH WATER

Water can be used for Fun

Fun with Water
