Spring

- Season -

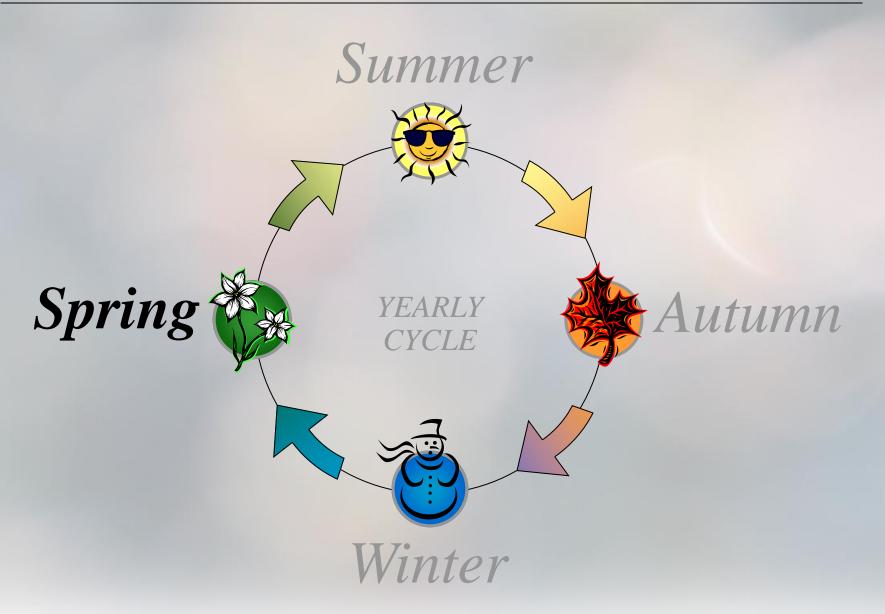

Our year is divided into four seasons, each made up of three months.

Each season is known for its weather, temperature, daylight and colour.

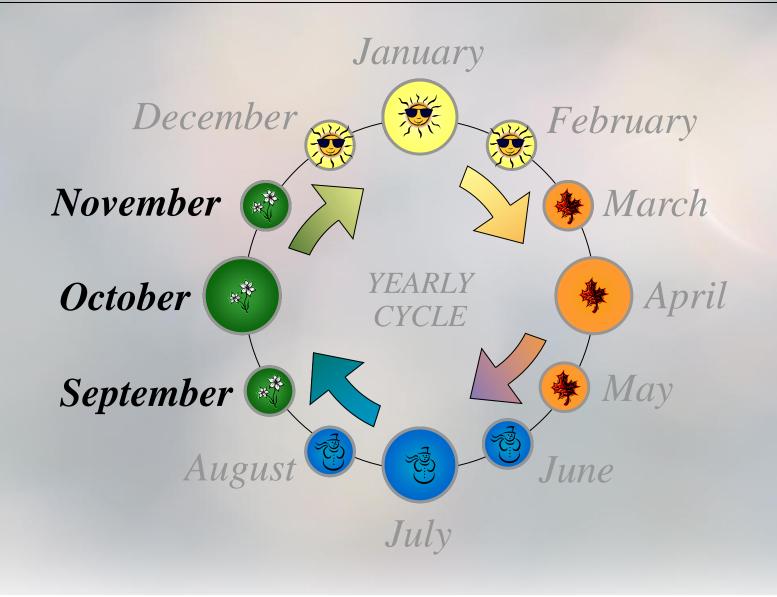

They are also known by how nature responds to them.

Every season is different due to the Earth's changing position in relation to the Sun.

SPRING

As spring approaches the days get longer and warmer, birds begin to breed, insects return in force, animals become more active and humans enjoy the outdoors more. Plants produce new buds and flowers, and grow at a faster speed than in other seasons.

MOLLUSCS

Molluscs are active in Spring.

BIRDS

Birds are more active and build nests and homes in Spring. Spring also means there is more food available for them.

NATIONAL WATTLE DAY

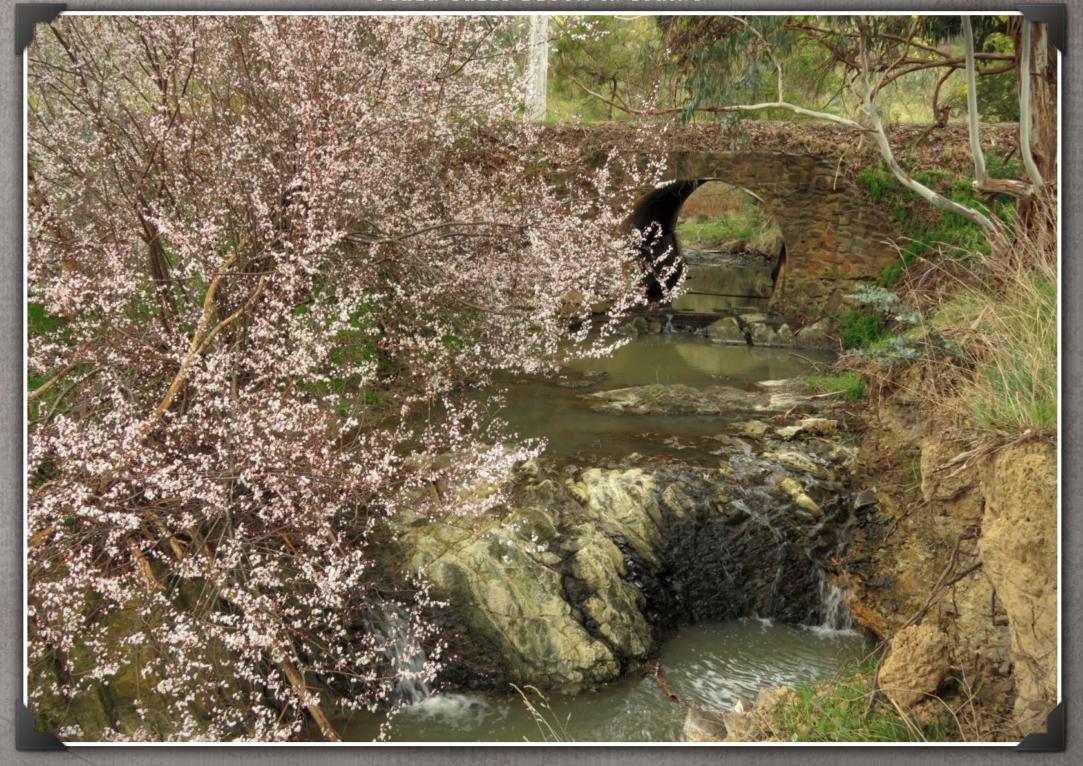

The first day of Spring in Australia is also known as Wattle Day. This is because many acacia species (known as wattles) are in flower. It is normal that people wear a piece of wattle on this patriotic day.

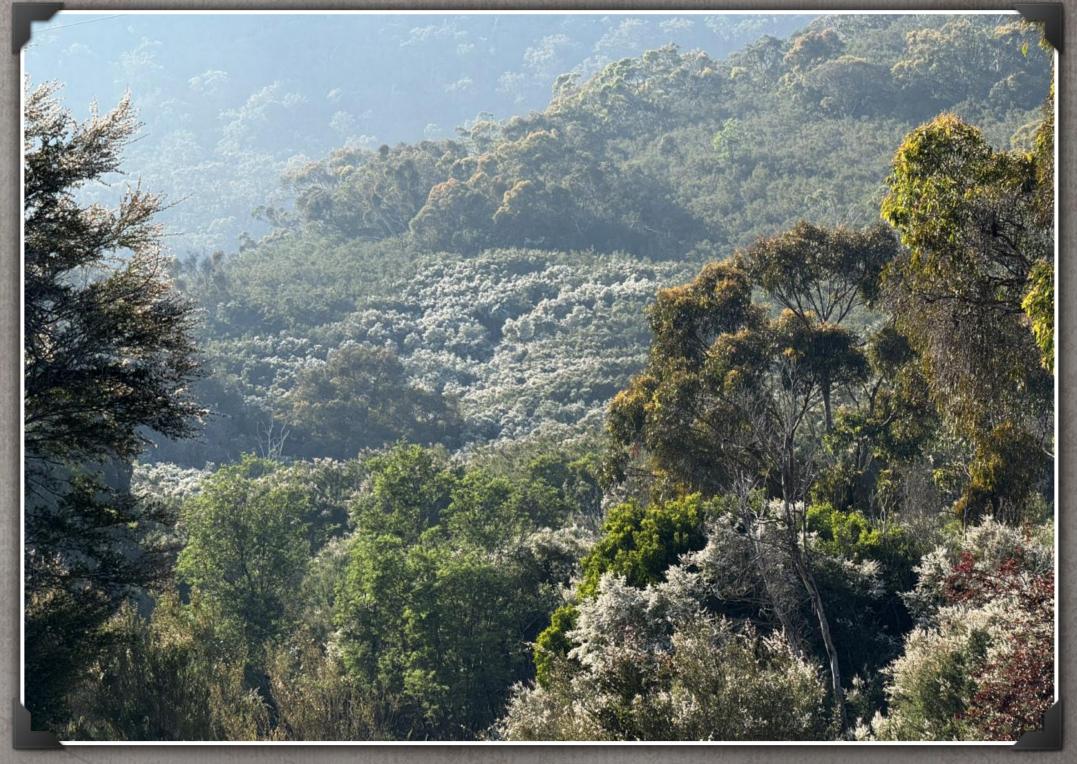

SPRING EQUINOX

As we enter the season of spring an astronomical phenomenon known as the spring equinox occurs. It happens twice a year when the night and day are around the same length. The spring equinox always occurs around 22 September.

THE EARLY NANCY IS ONE OF THE FIRST WILDFLOWERS TO BLOOM IN SPRING

NEW GROWTH

Spring plants spring forth with new growth. This is usually very visible, especially on plants that have lost their leaves during the Winter period.

POLLINATION

Pollination is the process of pollen being transferred to the female reproductive organ of a plant, allowing fertilisation to occur.

Insects are vital to pollination.

CYCLE OF LIFE

As the warmer months approach, life regenerates.

We see a new cycle of life, where a new generation of life is born.

CHICKS WAIT FOR THEIR PARENTS TO BRING THEM FOOD

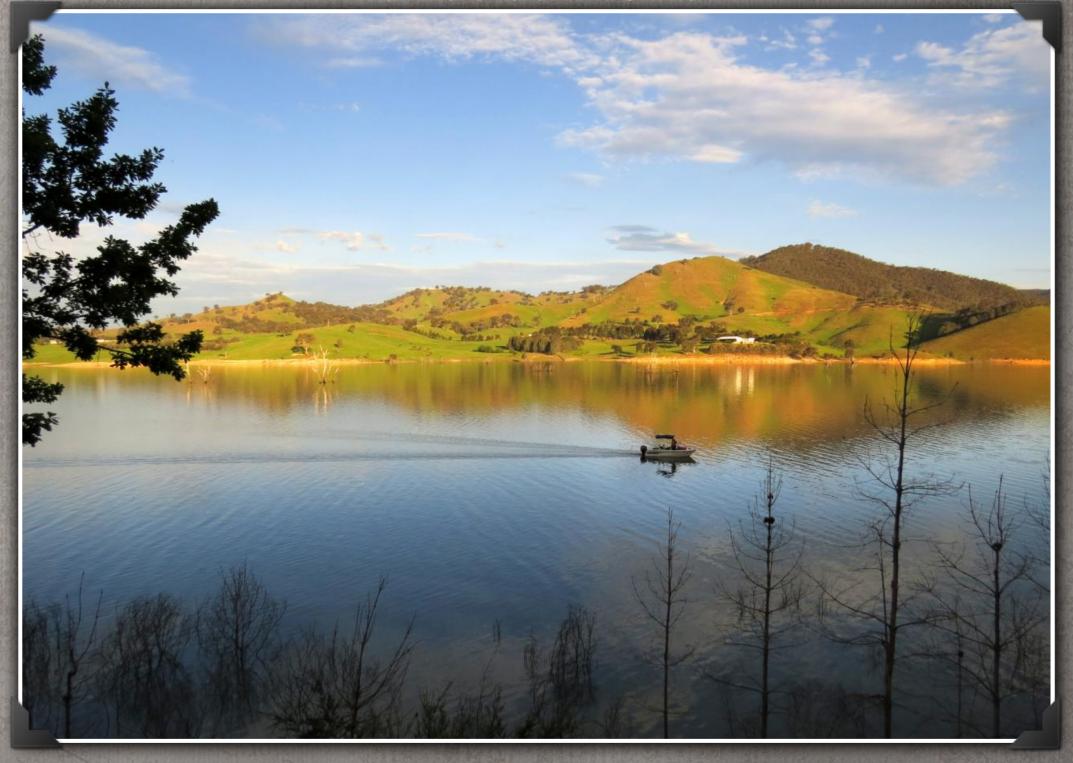

RECREATIONAL ACTIVITY

The warming weather of Spring draws people outside. It is a time when people feel happier as the days become longer, the light becomes brighter, and it is warm enough to be outside having fun.

DAYLIGHT SAVING

Daylight saving was first mentioned by American politician/inventor Benjamin Franklin in 1784 as a way to reduce lighting costs. It was first introduced by the German Empire and Austria-Hungary on 30 April 1916. In Australia it commences in Spring.

'epic'

epic - (adjective) Surpassing the usual or ordinary ePic - (noun) Illustrated by electronic pictures
