# Water

- David & Debbie Hibbert -

Water is the most abundant mineral  
on Earth and the most vital for life.

This small ePic captures a few  
images of water in different  
states for your enjoyment.

SEAS

SPRINGS

OCEANS

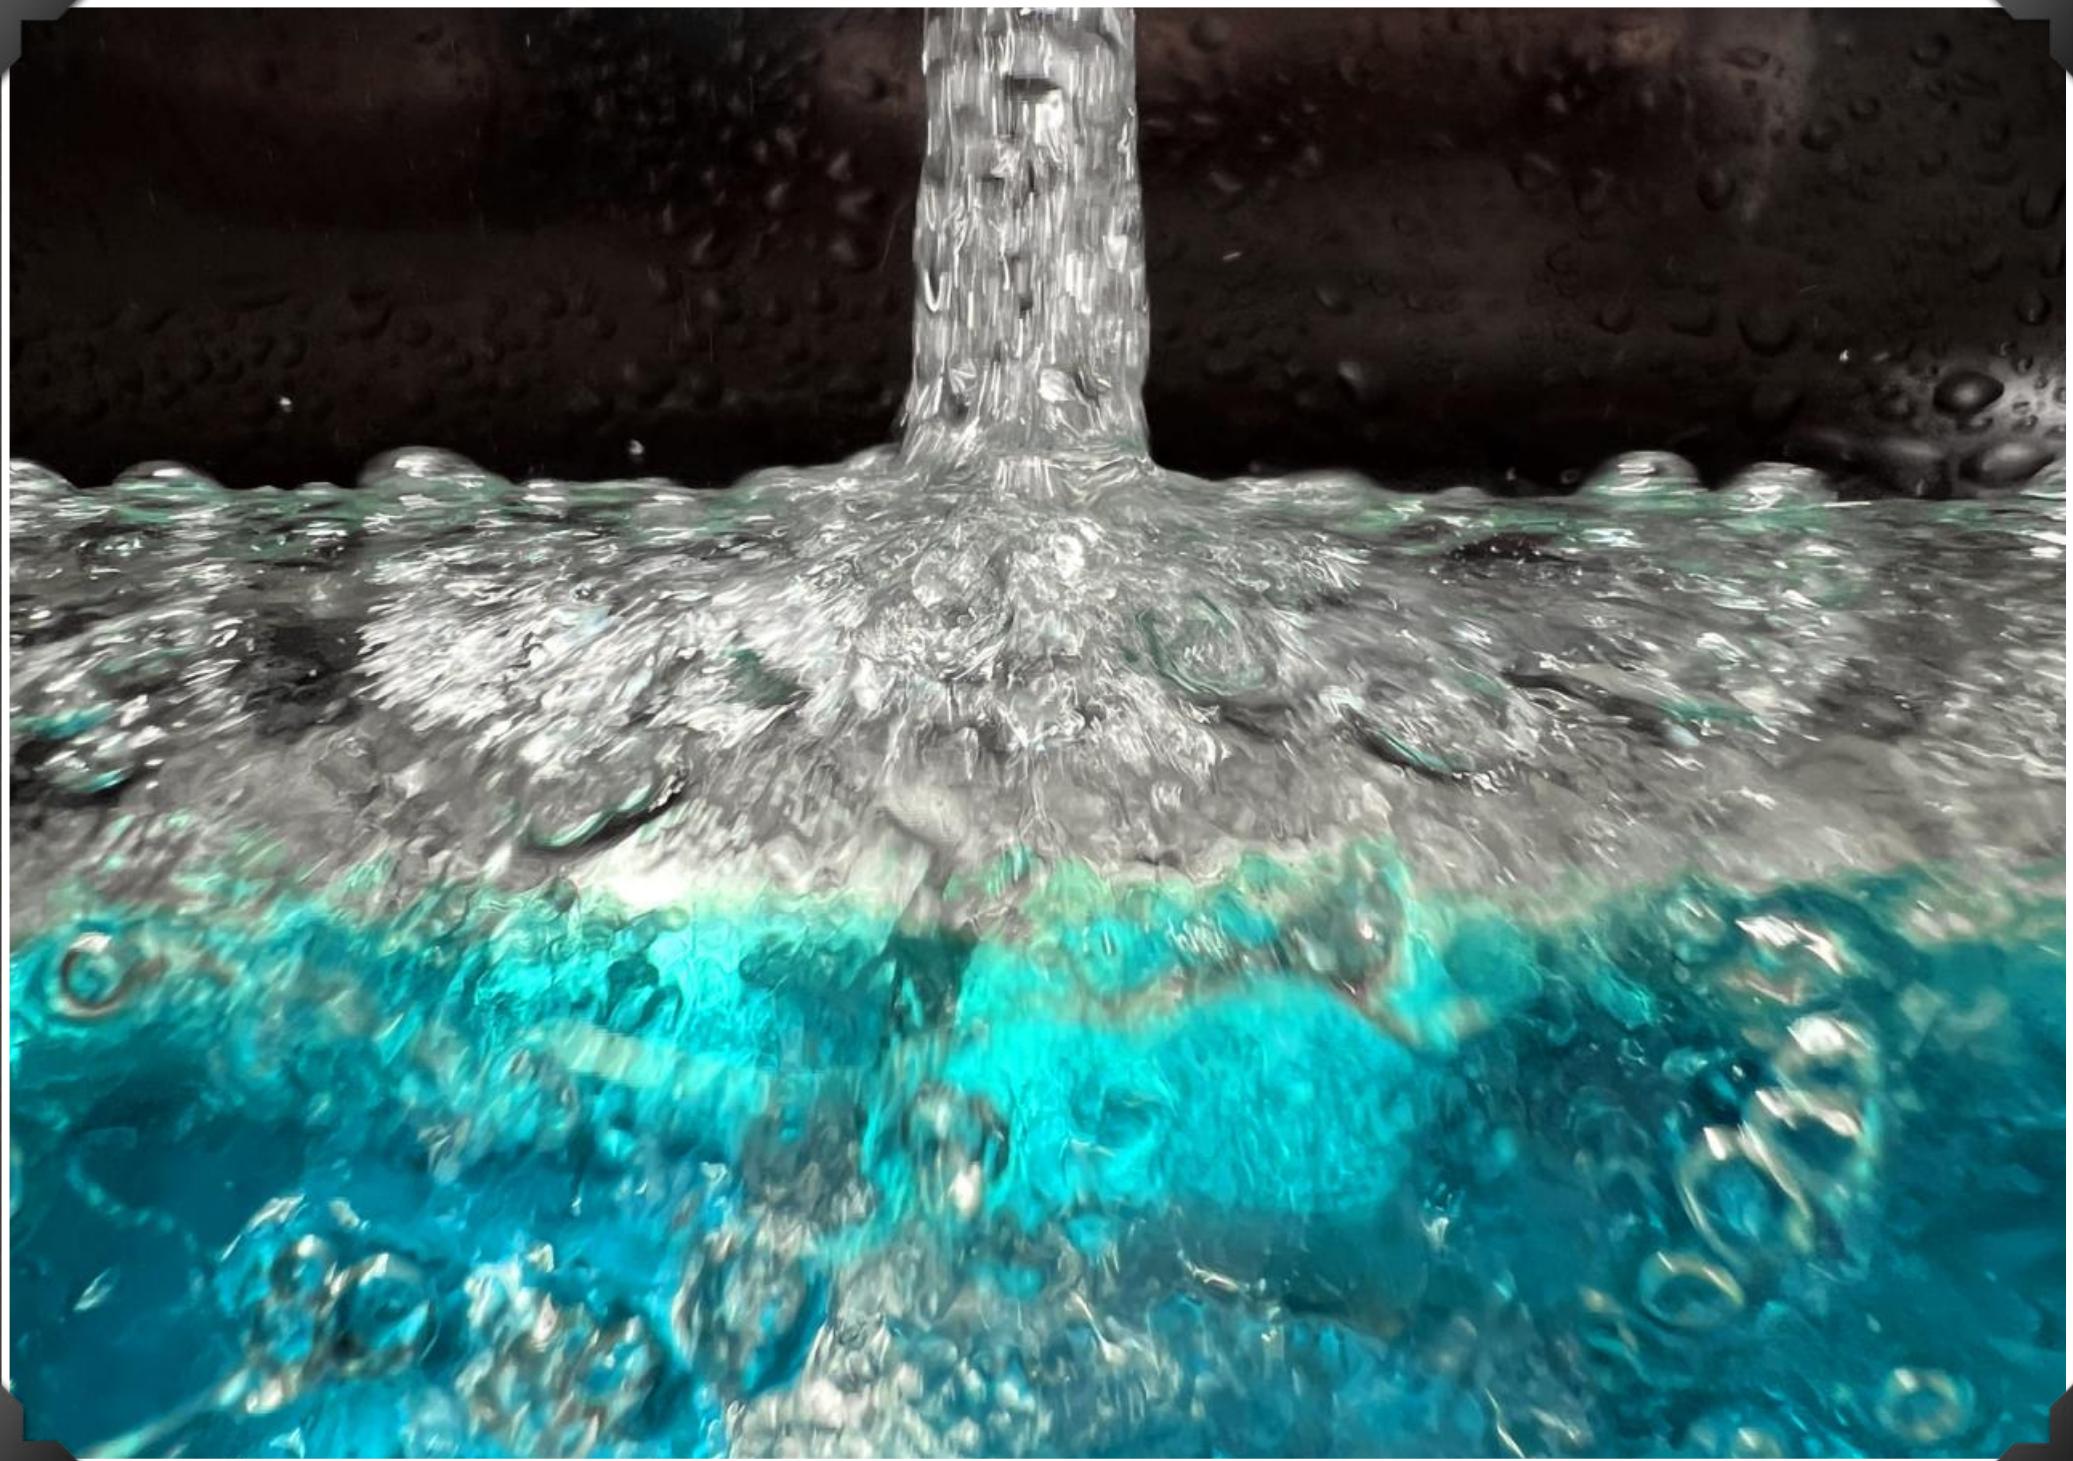

CREEKS & STREAMS

SNOW

RIVERS

ICE

WATER

# WATER

A transparent, odourless, tasteless and nearly colourless edible chemical substance.

Water is found in areas such as springs, rivers and lakes, after it falls from the sky as rain or snow.

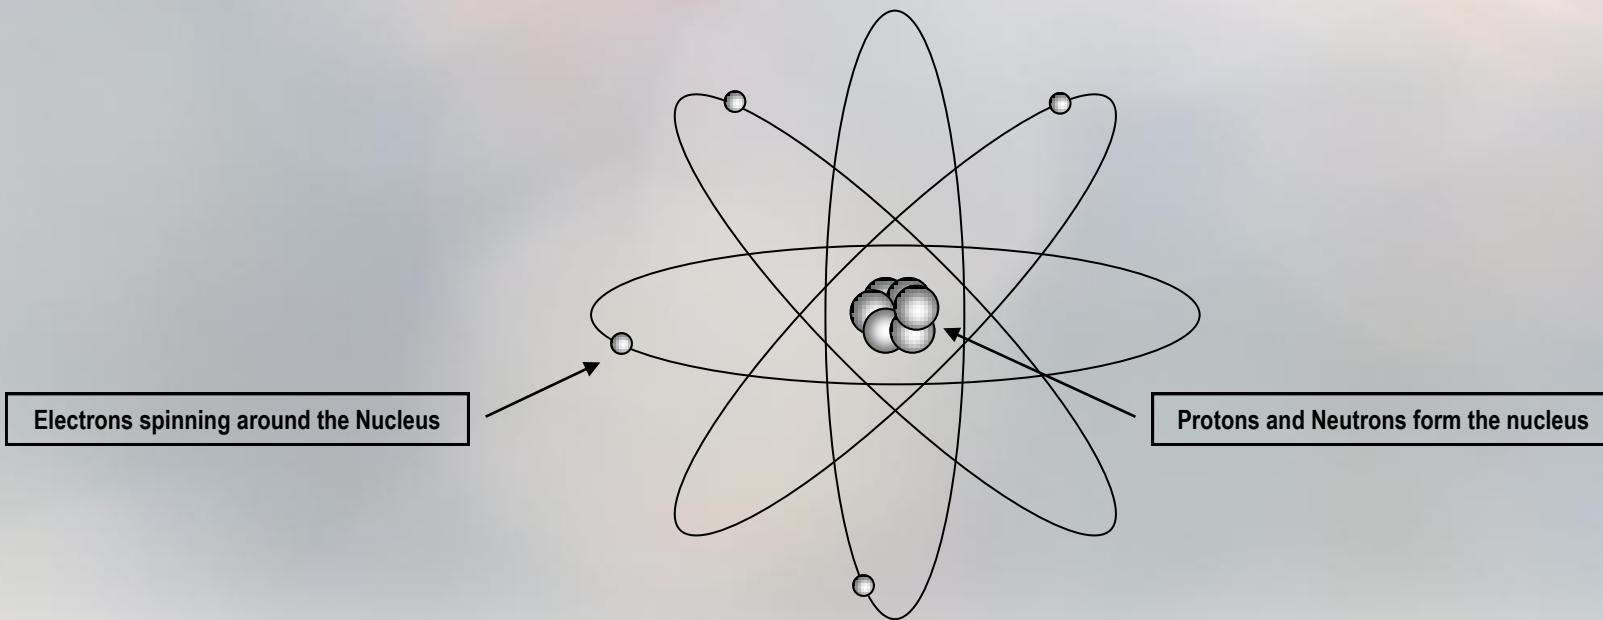

Water is made up of three Atoms which form a water Molecule. When trillions of these molecules group together they give us visible water.

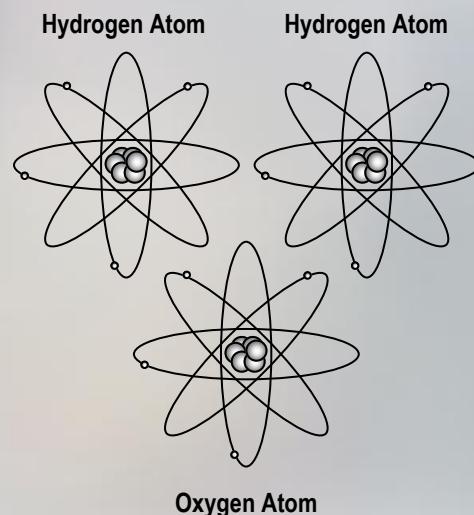

# ATOM

The smallest particle of matter that is known to exist.  
Atoms are made up of electrons, protons and neutrons.

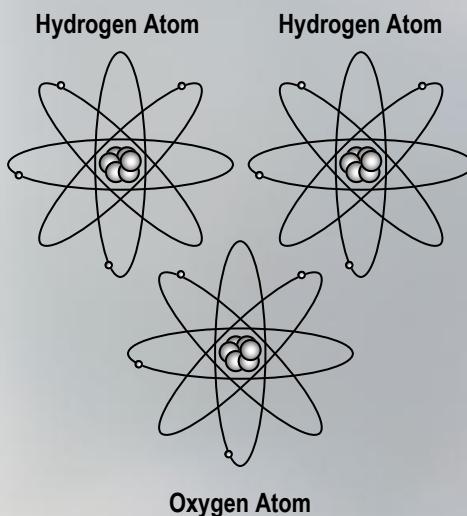

# MOLECULE

Two or more atoms bond together to form a molecule. These are also known as chemical compounds. Different combinations of atoms form different compounds.

# CHEMICAL

The name of the chemical compound for water is  $\text{H}_2\text{O}$ .  
This means water is made from two hydrogen atoms  
and one oxygen atom bonded together.

# RAIN

WATER FALLING FROM THE SKY

RAIN CLOUDS

RAIN

# RIVERS

LARGER FLOWING BODIES OF WATER

GOULBURN RIVER, THORNTON

TIDAL RIVER, WILSONS PROMOTORY

WOLLOMOMBI GORGE, WOLLOMOMBI RIVER, NSW

MURRAY RIVER, MILDURA

# LENGTH

Australia's longest single river is the Murray River. When the longest tributary of each river is taken into account, the Darling River is the longest.

Victoria's longest single river is the Goulburn River.

BIG RIVER, VICTORIA

DANGAR FALLS, BIELSDOWN RIVER, NSW

# LAKES

INLAND BODIES OF WATER SURROUNDED BY LAND

LAKE EILDON

THOMSON LAKE

LAKE BENALLA

# BELLBRIDGE BRIDGE OVER LAKE HUME

SUGARLOAF RESERVOIR

LAKE NILLAHCOOTIE

# SEAS

LARGE BODIES OF WATER CLOSE TO LAND

WRECK BEACH

SHIPWRECK COAST, GREAT OCEAN ROAD

THE PINNACLES, PHILLIP ISLAND

SHIPWRECK COAST, GREAT OCEAN ROAD

SHIPWRECK COAST, GREAT OCEAN ROAD

MARRINERS LOOKOUT, APOLLO BAY

# OCEANS

EXTRA LARGE BODIES OF WATER FURTHER FROM LAND

SNOWMAN

# SOLID AND GAS

Water freezes when it is cooled below  $0^{\circ}$  Celsius  
and boils when heated to  $100^{\circ}$  Celsius.

When boiling, water becomes steam.
